OVERVIEW

Cisco HyperFlex™ Systems unlock the full potential of hyperconvergence. The systems are based on an end-to-end software-defined infrastructure, combining software-defined computing in the form of Cisco Unified Computing System (Cisco UCS) servers; software-defined storage with the powerful Cisco HX Data Platform and software-defined networking with the Cisco UCS fabric that will integrate smoothly with Cisco Application Centric Infrastructure (Cisco ACI™). Together with a single point of connectivity and hardware management, these technologies deliver a preintegrated and adaptable cluster that is ready to provide a unified pool of resources to power applications as your business needs dictate.

The Cisco HyperFlex HX220C M6 All NVMe/All Flash/Hybrid Server Nodes extends the capabilities of Cisco's HyperFlex portfolio in a 1U form factor with the addition of the 3rd Gen Intel® Xeon® Scalable Processors (Ice Lake), 16 DIMM slots per CPU for 3200-MHz DDR4 DIMMs with DIMM capacity points up to 128 GB. The maximum memory capacity for 2 CPUs is listed here:

- 4 TB: 32 x 128 GB DDR4 DIMMs or
- 10 TB: 16 x 128 GB DDR4 DIMMs and 16 x 512 GB Intel® Optane™ Persistent Memory Modules (PMem)

Drives

There are three server nodes to choose from:

- **HXAF220C-M6SN (All NVMe)** (see [Figure 1 on page 5](#)):
 - Up to 10 front NVMe SSDs (only).
- **HXAF220C-M6S (All Flash)** (see [Figure 1 on page 5](#)):
 - Up to 10 front SFF SAS/SATA SSDs and NVMe caching drive.
- **HX220C-M6S (Hybrid)** (see [Figure 1 on page 5](#)):
 - Up to 10 front SFF SAS/SATA HDDs and SSDs.

Rear PCIe Risers

- One to three half-height PCIe risers, or
- One to two full-height PCIe risers.

The server provides an internal slot for one of the following:

- Cisco 12G SAS pass-through HBA to control SAS/SATA drives.

NOTE: PCIe drives are controlled directly from the CPUs.

The Cisco HyperFlex HX220C M6 All NVMe/All Flash/Hybrid Server Nodes has two LOM ports (10Gbase-T LOM) and a single 1 GbE management port. A modular LAN on motherboard (mLOM) module provides up to two 100 GbE ports. A connector on the front of the chassis provides KVM functionality.

Deployment Options

Starting with HyperFlex 4.5(2a) the following 2 deployment options are supported:

- **HX Data Center with Fabric Interconnect** - This deployment option connects the server to Cisco Fabric Interconnect. The installation for this type of deployment can be done using the standalone installer or from the Intersight.
- **HX Data Center without Fabric Interconnect** - This deployment option allows server nodes to be directly connected to existing switches. The installation for this type of deployment can be done from the Intersight only.

See [Figure 1 on page 5](#) for front and rear views of the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes.

Figure 1 Cisco HX220C M6 All NVMe/All Flash/Hybrid Server Nodes

HXAF220C-M6SN (All NVMe)

10 front drives are all NVMe (only) drives

Front View (see [Figure 2 on page 6](#) for details)

HXAF220C-M6S (All Flash)

10 front drives are SAS/SATA SDDs and NVMe (up to 2 NVMe front drives) drives

Front View (see [Figure 3 on page 7](#) for details)

HX220C-M6S (Hybrid)

10 front drives are SAS/SATA HDDS and SDDs

Front View (see [Figure 4 on page 8](#) for details)

Rear View (one half-height riser version) (see [Figure 5 on page 10](#) for details)

Rear View (three half-height riser version) (see [Figure 6 on page 11](#) for details)

Rear View (two full-height riser version) (see [Figure 7 on page 12](#) for details)

DETAILED VIEWS

Chassis Front View - HXAF220C-M6SN (All NVMe)

Figure 2 shows the front view of the Cisco HyperFlex HXAF220C-M6SN (All NVMe) server node.

Detailed Chassis Rear Views

Figure 5 shows the details of the rear panel for the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes with one rear half-height PCIe riser.

Figure 6 shows the details of the rear panel for the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes with three rear half-height PCIe risers.

Figure 7 shows the details of the rear panel for the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes with two rear full-height PCIe risers.

One Half-Height Riser

NOTE: By default, 1-CPU server comes with only one half-height riser 1 installed. 2-CPU servers support all three half-height risers.

Figure 5 Chassis Rear View (one half-height, 3/4 length PCIe riser)

1	Riser 1 (CPU1 control) <ul style="list-style-type: none"> ■ Supports one PCIe slot ■ Slot 1 is half-height, 3/4 length, x16 	7	VGA display port (DB15 connector)
2	Riser 2 blanking panel	8	COM port (RJ45 connector)
3	Riser 3 blanking panel	9	1 GbE dedicated Ethernet management port
4	Power supplies (two, redundant as 1+1)	10 - 11	Dual 1/10 GbE Ethernet ports (LAN1, LAN2) LAN1 is left connector, LAN2 is right connector
5	Modular LAN on motherboard (mLOM)	12	USB 3.0 ports (two)
6	System ID pushbutton/LED	-	-

Three Half-Height Risers

NOTE: Only 2-CPU server support all three half-height risers.

Figure 6 Chassis Rear View (three half-height, 3/4 length PCIe risers)

1	Riser 1 (CPU1 control) <ul style="list-style-type: none"> ■ Supports one PCIe slot (slot 1) ■ Slot 1 is half-height, 3/4 length, x16 	7	VGA display port (DB15 connector)
2	Riser 2 (CPU1 control) <ul style="list-style-type: none"> ■ Supports one PCIe slot (slot 2) ■ Slot 2 is half-height, 3/4 length, x16 	8	COM port (RJ45 connector)
3	Riser 3 (CPU2 control) <ul style="list-style-type: none"> ■ Supports one PCIe slot (slot 3) ■ Slot 3 is half-height, 3/4 length, x16 	9	1 GbE dedicated Ethernet management port
4	Power supplies (two, redundant as 1+1)	10 - 11	Dual 1/10 GbE Ethernet ports (LAN1, LAN2) LAN1 is left connector, LAN2 is right connector
5	Modular LAN on motherboard (mLOM)	12	USB 3.0 ports (two)
6	System ID pushbutton/LED	-	-

Two Full-Height Risers

NOTE: 1-CPU server support only full-height riser 1 while 2-CPU server support both full-height risers.

Figure 7 Chassis Rear View (two full-height, 3/4-length PCIe risers)

1	Riser 1 (CPU1 control) <ul style="list-style-type: none"> ■ Plugs into riser 1 motherboard connector ■ Full-height, 3/4 length, x16 	6	VGA display port (DB15 connector)
2	Riser 2 (CPU2 control) <ul style="list-style-type: none"> ■ Plugs into riser 3 motherboard connector ■ Full-height, 3/4 length, x16 	7	COM port (RJ45 connector)
3	Power supplies (two, redundant as 1+1)	8	1 GbE dedicated Ethernet management port
4	Modular LAN on motherboard (mLOM)	9 - 10	Dual 1/10 GbE Ethernet ports (LAN1, LAN2) LAN1 is left connector, LAN2 is right connector
5	System ID pushbutton/LED	11	USB 3.0 ports (two)

BASE SERVER NODE STANDARD CAPABILITIES and FEATURES

Table 1 lists the capabilities and features of the base server node. Details about how to configure the server for a particular feature or capability (for example, number of processors, disk drives, or amount of memory) are provided in *CONFIGURING the SERVER, page 17*.

Table 1 Capabilities and Features

Capability/Feature	Description
Chassis	One rack unit (1RU) chassis
CPU	One or two 3rd Gen Intel® Xeon® Scalable Processors (Ice Lake) ¹
Chipset	Intel® C621A series chipset
Memory	32 slots for registered DIMMs (RDIMMs) or load-reduced DIMMs (LR DIMMs) and support for Intel® Optane™ Persistent Memory Modules (PMem)
Multi-bit Error Protection	This server supports multi-bit error protection.
Video	<p>The Cisco Integrated Management Controller (CIMC) provides video using the Matrox G200e video/graphics controller:</p> <ul style="list-style-type: none"> ■ Integrated 2D graphics core with hardware acceleration ■ Embedded DDR memory interface supports up to 512 MB of addressable memory (8 MB is allocated by default to video memory) ■ Supports display resolutions up to 1920 x 1200 16bpp @ 60Hz ■ High-speed integrated 24-bit RAMDAC ■ Single lane PCI-Express host interface running at Gen 1 speed
Power subsystem	<p>Up to two of the following hot-swappable power supplies:</p> <ul style="list-style-type: none"> ■ 1050 W (AC) ■ 1050 W (DC) ■ 1600 W (AC) ■ 2300 W (AC) <p>One power supply is mandatory; one more can be added for 1 + 1 redundancy.</p>
Front Panel	A front panel controller provides status indications and control buttons
ACPI	This server supports the advanced configuration and power interface (ACPI) 6.2 standard.
Fans	Eight hot-swappable fans for front-to-rear cooling

Table 1 Capabilities and Features (continued)

Capability/Feature	Description
Expansion slots	<p>Three half-height riser slots</p> <ul style="list-style-type: none"> ■ Riser 1 (controlled by CPU 1): <ul style="list-style-type: none"> • One x16 PCIe Gen4 Slot, (Cisco VIC), half-height, 3/4 length ■ Riser 2 (controlled by CPU 1): <ul style="list-style-type: none"> • One x16 PCIe Gen4 Slot, half-height, 3/4 length ■ Riser 3 (controlled by CPU 2): <ul style="list-style-type: none"> • One x16 PCIe Gen4 Slot, (Cisco VIC), half-height, 3/4 length <p>Two full-height riser slots</p> <ul style="list-style-type: none"> ■ Riser 1 (controlled by CPU 1): <ul style="list-style-type: none"> • One x16 PCIe Gen4 Slot, (Cisco VIC), full-height, 3/4 length ■ Riser 2² (controlled by CPU 2): <ul style="list-style-type: none"> • One x16 PCIe Gen4 Slot, (Cisco VIC), full-height, 3/4 length
Interfaces	<ul style="list-style-type: none"> ■ Rear panel <ul style="list-style-type: none"> • One 1Gbase-T RJ-45 management port • Two 10Gbase-T LOM ports • One RS-232 serial port (RJ45 connector) • One DB15 VGA connector • Two USB 3.0 port connectors • One flexible modular LAN on motherboard (mLOM) slot that can accommodate various interface cards ■ Front panel <ul style="list-style-type: none"> • One KVM console connector (supplies two USB 2.0 connectors, one VGA DB15 video connector, and one serial port (RS232) RJ45 connector)

Table 1 Capabilities and Features (continued)

Capability/Feature	Description
Internal storage devices	<p><u>Drive storage:</u></p> <p>This is orderable in three different server nodes:</p> <p>HXAF220C-M6SN (All NVMe):</p> <ul style="list-style-type: none"> ■ Up to 10 SFF NVMe PCIe solid state drives (SSDs) only. 10 Drives are used as below: <ul style="list-style-type: none"> • Six to eight NVMe SSD (for capacity) • One NVMe SSD (for caching) • One NVMe SSD (system drive for HXDP operations) <p>HXAF220C-M6S (All Flash):</p> <ul style="list-style-type: none"> ■ Up to 10 SFF SAS/SATA/NVMe solid state drives (SSDs). 10 Drives are used as below: <ul style="list-style-type: none"> • Six to eight SAS/SATA SSD or six to eight SED SAS/SATA SSD (for capacity) • One NVMe SSD or one SAS/SATA SSD or one SED SAS/SATA SSD (for caching) • One SAS/SATA SSD (system drive for HXDP operations) <p>HX220C-M6S (Hybrid):</p> <ul style="list-style-type: none"> ■ Up to 10 SFF SAS/SATA hard drives (HDDs) and SAS/SATA solid state drives (SSDs). 10 Drives are used as below: <ul style="list-style-type: none"> • Six to eight SAS HDD or six to eight SED SAS HDD (for capacity) • One SAS/SATA SSD or one SED SAS/SATA SSD (for caching) • One SAS/SATA SSD (system drive for HXDP operations) <p><u>Other storage:</u></p> <ul style="list-style-type: none"> ■ A mini-storage module connector on the motherboard supports a boot-optimized RAID controller carrier that holds up two SATA M.2 SSDs. Mixing different capacity SATA M.2 SSDs is not supported.
Integrated management processor	<p>Baseboard Management Controller (BMC) running Cisco Integrated Management Controller (CIMC) firmware.</p> <p>Depending on your CIMC settings, the CIMC can be accessed through the 1GE dedicated management port, the 1GE/10GE LOM ports, or a Cisco virtual interface card (VIC).</p> <p>CIMC manages certain components within the server, such as the Cisco 12G SAS HBA.</p>
Storage controllers	<ul style="list-style-type: none"> ■ Cisco 12G SAS HBA (for Hybrid and All Flash servers): <ul style="list-style-type: none"> • No RAID support • JBOD/Pass-through Mode support • Supports up to 10 SAS/SATA internal drives

Table 1 Capabilities and Features (continued)

Capability/Feature	Description
Modular LAN on Motherboard (mLOM)	The dedicated mLOM slot on the motherboard can flexibly accommodate the following cards: <ul style="list-style-type: none">■ Cisco Virtual Interface Cards
Intersight	Intersight provides server management capabilities
CIMC	Cisco Integrated Management Controller 4.2(1) or later

Notes:

1. If NVMe drives are selected, you must also select 2 CPUs.
2. There are three PCIe riser connectors on the motherboard: they are labeled Riser 1, Riser 2, and Riser 3. If the server is configured with three half-height risers, Riser 1 plugs into Riser 1 connector, Riser 2 plugs into Riser 2 connector, and Riser 3 plugs into Riser 3 connector. If the server is configured with two full-height connectors, Riser 1 plugs into Riser 1 connector and Riser 2 plugs into Riser 3 connector. See [Risers, page 74](#) for more details.

CONFIGURING the SERVER

Follow these steps to configure the Cisco HX220C M6 All NVMe/All Flash/Hybrid Server Nodes:

- *STEP 1 VERIFY SERVER SKU, page 18*
- *STEP 2 SELECT DEPLOYMENT MODE (OPTIONAL), page 19*
- *STEP 3 SELECT RISERS, page 20*
- *STEP 4 SELECT CPU(s), page 21*
- *STEP 5 SELECT MEMORY, page 26*
- *STEP 6 SELECT DRIVE CONTROLLERS, page 31*
- *STEP 7 SELECT DRIVES, page 32*
- *STEP 8 SELECT HYPERFLEX CONNECTIVITY MODE, page 40*
- *STEP 9 SELECT OPTION CARD(s), page 41*
- *STEP 10 ORDER OPTIONAL PCIe OPTION CARD ACCESSORIES, page 43*
- *STEP 11 ORDER GPU CARDS (OPTIONAL), page 46*
- *STEP 12 ORDER POWER SUPPLY, page 47*
- *STEP 13 SELECT INPUT POWER CORD(s), page 48*
- *STEP 14 ORDER TOOL-LESS RAIL KIT AND OPTIONAL REVERSIBLE CABLE MANAGEMENT ARM, page 52*
- *STEP 15 ORDER SECURITY DEVICES (OPTIONAL), page 53*
- *STEP 16 SELECT LOCKING SECURITY BEZEL (OPTIONAL), page 54*
- *STEP 17 SELECT HOST OPERATING SYSTEM, page 55*
- *STEP 18 SELECT HYPERFLEX DATA PLATFORM (HXDP) SOFTWARE, page 56*
- *STEP 19 CISCO INTERSIGHT, page 57*
- *STEP 20 SELECT INSTALLATION SERVICE, page 58*
- *STEP 21 SELECT SERVICE and SUPPORT LEVEL, page 59*

STEP 1 VERIFY SERVER SKU

Table 2 PID of Major Line Bundle (MLB)

Product ID (PID)	Description
HX-M6-MLB	HX/HXAF/EDG M6 MLB This major line bundle (MLB) consists of the HyperFlex All Flash, Hybrid and Edge Server Nodes, with Intersight and HXDP software spare PIDs.

Verify the product ID (PID) of the server node as shown in [Table 3](#).

Table 3 PID of the HX220 M6 All NVMe/All Flash/Hybrid Server Nodes

Product ID (PID)	Description
HXAF220C-M6SN ¹ (All NVMe)	Cisco HyperFlex HX220 M6 All NVMe server node is up to 10 SFF front drives (NVMe PCIe SSDs only) with no CPU, memory, HDD, PCIe cards, or power supply.
HXAF220C-M6S ¹ (All Flash)	Cisco HyperFlex HX220 M6 All Flash server node is up to 10 SFF front drives and with no CPU, memory, HDD, PCIe cards, or power supply.
HX220C-M6S ¹ (Hybrid)	Cisco HyperFlex HX220 M6 Hybrid server node is up to 10 SFF front drives and with no CPU, memory, HDD, PCIe cards, or power supply.

Notes:

1. This product may not be purchased outside of the approved bundles (must be ordered under the MLB).

The Cisco HyperFlex HX220 All NVMe, All Flash and Hybrid M6 server nodes do not include power supplies, CPUs, DIMM memory, Intel® Optane™ Persistent Memory (PMem), hard disk drives (HDDs), solid-state drives (SSDs), NVMe drives, riser 1, riser 2, riser 3, tool-less rail kit, or option cards.

NOTE:

- Refer to [Cisco HyperFlex Drive Compatibility](#) document for future expansion and drive compatibility within the same node and HX cluster.
- Use the steps on the following pages to configure the server with the components that you want to include.

STEP 2 SELECT DEPLOYMENT MODE (OPTIONAL)

Starting with HyperFlex 4.5(2a), the following 2 deployment options are supported

Select deployment mode

The available deployment modes are listed in [Table 4](#)

Table 4 Deployment Modes

Product ID (PID)	Description
HX-DC-FI	Deployment mode Selection PID to use Hyperflex with FI
HX-DC-NO-FI	Deployment mode Selection PID to use Hyperflex without FI

- **HX Data Center with Fabric Interconnect** - This deployment option connects the server to Cisco Fabric Interconnect. The installation for this type of deployment can be done using the standalone installer or from the Intersight. This deployment mode has been supported since launch of HyperFlex.
- **HX Data Center without Fabric Interconnect** - This deployment option allows server nodes to be directly connected to existing switches. The installation for this type of deployment can be done from the Intersight only.

Note the following apply:

- No support for SED drives
- No hyper-V support
- No support for PMem
- No support for Additional PCIe Cisco VIC
- No support for stretch cluster
- No support for Application acceleration engine

Selecting this option will hence grey out the unsupported options during ordering

NOTE:

- HX Data Center without Fabric Interconnect (DC-no-FI) All NVMe - HXAF220C-M6SN require HXDP 5.0(1b) or higher.
- If no selection is done, the deployment mode is assumed to be DC with FI

STEP 3 SELECT RISERS

The riser PIDs are listed in [Table 5](#). Full-height risers cannot be mixed with half-height risers.

Table 5 PIDs of the Risers and Riser Blanks

Product ID (PID)	Description
Included by default (no PID)	Half-height riser 1 (controlled by CPU1) <ul style="list-style-type: none"> ■ One x16 PCIe Gen4 riser, standard PCIe, supports Cisco VIC, half-height, 3/4 length
UCSC-R2R3-C220M6	Kit containing two half-height risers (risers 2 and 3): <ul style="list-style-type: none"> ■ Riser 2: One x16 PCIe Gen4 riser, half-height, 3/4 length ■ Riser 3: One x16 PCIe Gen4 riser, supports Cisco VIC, half-height, 3/4 length
HX-GPURKIT-C220	Kit containing a GPU mounting bracket and the following risers (risers 1 and 2): <ul style="list-style-type: none"> ■ Riser 1: One x16 PCIe Gen4 riser, supports Cisco VIC, full-height, 3/4 length ■ Riser 2: One x16 PCIe Gen4 riser, supports Cisco VIC, full-height, 3/4 length
UCSC-FBRS-C220M6	Riser 2 and Riser 3 blank panels

NOTE:

- If you do not order any risers, the system defaults to automatically include the one half-height riser shown in the table.
- If you order PID UCSC-R2R3-C220M6, the system includes three half-height risers (riser 1, riser 2, and riser 3).
- If you order PID HX-GPURKIT-C220, the system includes two full-height risers (riser 1 and riser 2)

Approved Configurations

- (1) Half-height riser 1 only (controlled from CPU1). This is the default and is automatically included.
- (2) Half-height risers 1, 2, and 3 only. Risers 1 and 2 are controlled from CPU1 and Riser 3 is controlled from CPU2
- (3) Full-height risers 1 and 2 only. Riser 1 is controlled from CPU1 and riser 2 is controlled from CPU2.

STEP 4 SELECT CPU(s)

The standard CPU features are:

- 3rd Gen Intel® Xeon® Scalable Processors (Ice Lake)
- Intel® C621 series chipset
- Cache size of up to 60 MB
- Up to 40 cores

Select CPUs

The available CPUs are listed in [Table 6](#).

Table 6 Available CPUs

Product ID (PID)	Clock Freq (GHz)	Power (W)	Cache Size (MB)	Cores	UPI ¹ Links (GT/s)	Highest DDR4 DIMM Clock Support (MHz) ²	Support HyperFlex Boost Mode		Support PMem
							All Flash	All NVMe

Notes:

- UPI = Ultra Path Interconnect.
- If higher or lower speed DIMMs are selected than what is shown in [Table 8 on page 27](#) for a given CPU speed, the DIMMs will be clocked at the lowest common denominator of CPU clock and DIMM clock.
- The maximum number of HX-CPU-I8351N CPUs is one
- The maximum number of HX-CPU-I6314U CPUs is one
- The maximum number of HX-CPU-I6312U CPUs is one

CAUTION: For systems configured with 3rd Gen Intel® Xeon® Scalable Processors (Ice Lake) processors operating above 28° C [82.4° F], a fan fault or executing workloads with extensive use of heavy instructions sets such as Intel® Advanced Vector Extensions 512 (Intel® AVX-512), may assert thermal and/or performance faults with an associated event recorded in the System Event Log (SEL).

Table 7 CPU Suffixes

CPU Suffix	Description	Features
N	Networking Optimized	Optimized for use in networking applications like L3 forwarding, 5G UPF, OVS DPDK, VPP FIB router, VPP IPsec, web server/NGINX, vEPC, vBNG, and vCMTS. SKUs have higher base frequency with lower TDPs to enable best performance/Watt
P	Cloud Optimized	SKU specifically designed for cloud IaaS environments to deliver higher frequencies at constrained TDPs
V	Cloud Optimized	SKUs specifically designed for cloud environments to deliver high rack density and maximize VM/cores per TCO\$
T	High T case	SKUs designed for Network Environment-Building System (NEBS) environments
U	1-socket Optimized	Optimized for targeted platforms adequately served by the cores, memory bandwidth and IO capacity available from a single processor
S	Max SGX enclave size	Supports Max SGX enclave size (512GB) to enhance and protect the most sensitive portions of a workload or service
M	Media and AI optimized	Media, AI and HPC Segment Optimized for lower TDP & higher frequencies delivering better perf/w
Y	Speed Select - Performance Profile	Intel® Speed Select Technology provides the ability to set a guaranteed base frequency for a specific number of cores, and assign this performance profile to a specific application/workload to guarantee performance requirements. It also provides the ability to configure settings during runtime and provide additional frequency profile configuration opportunities.

Approved Configurations

(1) DIMM only configurations:

- Select one or two identical CPUs listed in [Table 6 Available CPUs, page 21](#).

(2) DIMM/PMem Mixed Configurations:

- You must select two identical CPUs listed in [Table 6 Available CPUs, page 21](#).

Data Center Deployment Mode:

NOTE: Data center deployment mode without fabric interconnect (HX-DC-no-FI) does not support Intel® Optane™ Persistent Memory (PMem). Refer to [STEP 2](#) for the details

(3) One-CPU Configuration

- Choose one CPU from any one of the rows of [Table 6 Available CPUs, page 21](#).
- For 1-CPU systems, the server is shipped by default with riser 1 only.
- HX DC supports single socket for 12 core and above

(4) Two-CPU Configuration

- Choose two identical CPUs from any one of the rows of [Table 6 Available CPUs, page 21](#).
- For 2-CPU systems, the server is shipped:
 - With half-height risers 1, 2, and 3 by default, or
 - With full-height risers 1 and 2 if you order a non-T4 GPU with more than 75 W power dissipation.

(5) For the HXAF220C-M6SN (All NVMe) server node:

- You must select two identical CPUs listed in [Table 6 Available CPUs, page 21](#).
- Dual socket is required with All NVMe server.

NOTE:

- You cannot have two I8351N or two I6314U or I6312U CPUs in a two-CPU configuration.
 - If you configure a server with one I8351N CPU or one I6314U CPU or one I6312U CPU you cannot later upgrade to a 2-CPU system with two of these CPUs.
-

Caveats

- The selection of 1 or 2 CPUs depends on the desired server functionality. See the following sections:
 - [STEP 5 SELECT MEMORY, page 26](#)
 - [STEP 6 SELECT DRIVE CONTROLLERS, page 31](#)
 - [STEP 7 SELECT DRIVES, page 32](#)
 - [STEP 8 SELECT HYPERFLEX CONNECTIVITY MODE, page 40](#)

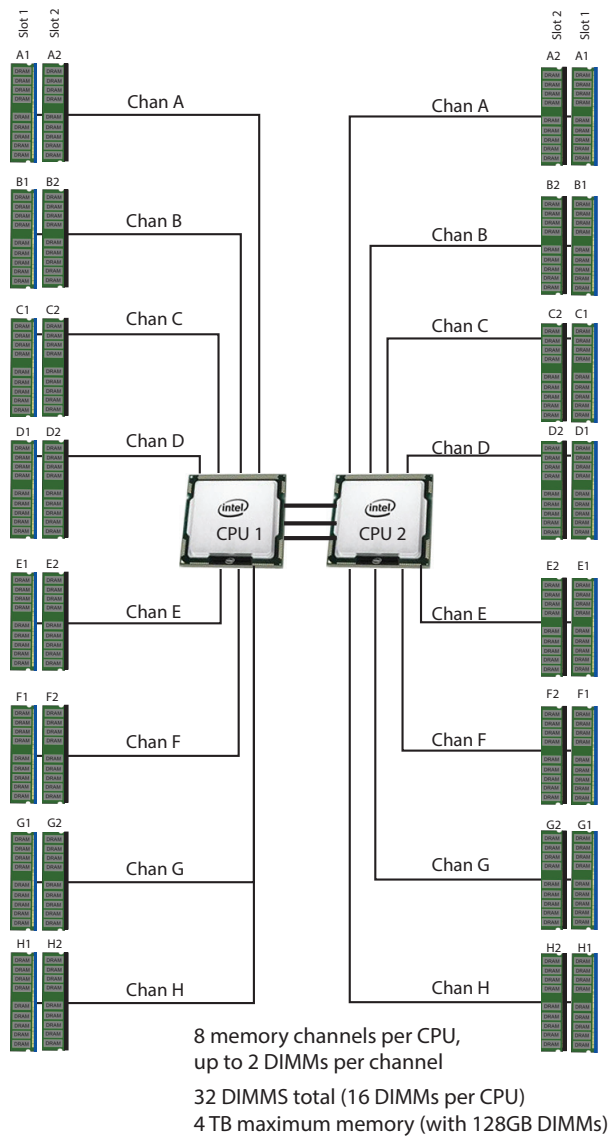

STEP 5 SELECT MEMORY

The available memory main characteristics for the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes are as follows:

- Clock speed: 3200 MHz
- Ranks per DIMM: 1, 2, 4, or 8
- Operational voltage: 1.2 V
- Registered ECC DDR4 DIMMs (RDIMMs), Load-reduced DIMMs (LR DIMMs), or Intel® Optane™ Persistent Memory Modules (PMem)

Memory is organized with eight memory channels per CPU, with up to two DIMMs per channel, as shown in [Figure 8](#).

Figure 8 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes Memory Organization

DIMMs and PMem

The supported memory options are listed in [Table 8](#).

Table 8 Available DDR4 DIMMs and PMem

Product ID (PID)	PID Description	Voltage	Ranks /DIMM
3200-MHz DIMMs			
HX-MR-X16G1RW	16 GB RDIMM SRx4 3200 (8Gb)	1.2 V	1
HX-MR-X32G1RW	32 GB RDIMM SRx4 3200 (16Gb)	1.2 V	1
HX-MR-X32G2RW	32 GB RDIMM DRx4 3200 (8Gb)	1.2 V	2
HX-MR-X64G2RW	64 GB RDIMM DRx4 3200 (16Gb)	1.2 V	2
HX-ML-128G4RW	128 GB LRDIMM QRx4 3200 (16Gb) (non-3DS)	1.2 V	4
Intel® Optane™ Persistent Memory (PMem)			
HX-MP-128GS-B0	Intel® Optane™ Persistent Memory, 128GB, 3200 MHz		
HX-MP-256GS-B0	Intel® Optane™ Persistent Memory, 256 GB, 3200 MHz		
HX-MP-512GS-B0	Intel® Optane™ Persistent Memory, 512 GB, 3200 MHz		
DIMM Blank¹			
UCS-DIMM-BLK	UCS DIMM Blank		
Intel® Optane™ Persistent Memory (PMem) Operational Modes			
HX-DCPMM-AD ²	Intel Optane DC Persistent Memory Operational Mode - App Di		
HX-DCPMM-MM ³	Intel Optane DC Persistent Memory Operational Mode - Memory		

Notes:

- Any empty DIMM slot must be populated with a DIMM blank to maintain proper cooling airflow.
- App Direct Mode:** PMem operates as a solid-state disk storage device. Data is saved and is non-volatile. Both PMem and DIMM capacities count towards the CPU capacity limit.
- Memory Mode:**
 - Please note that DCPMM - Memory mode configuration is on compliance hold review. Please contact: hxdcpmm_compliancehold@cisco.com
 - Please use the [HX M6 Memory Guide](#) to determine the correct DRAM:DCPMM ratio

Data Center Deployment Mode

NOTE: Data center deployment mode without fabric interconnect (HX-DC-no-FI) does not support HX-MP-512GS-A0, HX-MP-256GS-A0, HX-MP-128GS-A0, HX-DCPMM-AD and HX-DCPMM-MM. Refer to [STEP 2](#) for the details

**NOTE:**

- System performance is optimized when the DIMMs type and quantity are equal for both CPUs, and when all channels are filled equally across the CPUs in the server.
- The selected DIMMs must be all of same type and number of DIMMs must be equal for both CPUs.
- HyperFlex Data Platform reserves memory for each controller VM. Refer to the <[Install Guide](#)> for reservation details.
- The memory mirroring feature is not supported with HyperFlex nodes.

Memory Configurations, Features, and Modes

System speed is dependent on the CPU DIMM speed support. Refer to [Available CPUs, page 21](#) for DIMM speeds.

- The server supports the following memory reliability, availability, and serviceability (RAS) BIOS options (only one option can be chosen):
 - Adaptive Double Device Data Correction (ADDDC) (default).
 - Maximum performance.
- For best performance, observe the following:
 - When one DIMM is used, it must be populated in DIMM slot 1 (farthest away from the CPU) of a given channel.
 - When single- or dual-rank DIMMs are populated in two DIMMs per channel (2DPC) configurations, always populate the higher number rank DIMM first (starting from the farthest slot). For a 2DPC example, first populate with dual-rank DIMMs in DIMM slot 1. Then populate single-rank DIMMs in DIMM 2 slot.
- DIMMs for CPU 1 and CPU 2 (when populated) must always be configured identically.
- Cisco memory from previous generation servers (DDR3 and DDR4) is not compatible with the server.
- Memory can be configured in any number of DIMMs as pairs, although for optimal performance, see the following document:
[HX M6 Memory Guide](#)
- For detailed Intel® Optane™ Persistent Memory (PMem) configurations, refer to the following document:
https://www.cisco.com/content/en/us/td/docs/unified_computing/ucs/c/hw/c220m6/install/c220m6.html

Approved Configurations

(1) 1-CPU configuration:

- Select from 1 to 16 DIMMs
 - 1, 2, 4, 6, 8, 12, or 16 DIMMs allowed
 - 3, 5, 7, 9, 10, 11, 13, 14, 15 DIMMs not allowed
 - DIMMs for both CPUs must be configured identically.

The DIMMs will be placed by the factory as shown in the following tables.

#DIMMs	CPU 1 DIMM Placement in Channels (for identically ranked DIMMs)
1	(A1)
2	(A1, E1)
4	(A1, C1); (E1, G1)
6	(A1, C1); (D1, E1); (G1, H1)
8	(A1, C1); (D1, E1); (G1, H1); (B1, F1)
12	(A1, C1); (D1, E1); (G1, H1); (A2, C2); (D2, E2); (G2, H2)
16	(A1, B1); (C1, D1); (E1, F1); (G1, H1); (A2, B2); (C2, D2); (E2, F2); (G2, H2)

(2) 2-CPU configuration:

- Select from 1 to 16 DIMMs per CPU
 - 1, 2, 4, 6, 8, 12, or 16 DIMMs allowed
 - 3, 5, 7, 9, 10, 11, 13, 14, 15 DIMMs not allowed
 - DIMMs for both CPUs must be configured identically.

The DIMMs will be placed by the factory as shown in the following tables..

#DIMMs	CPU 1 DIMM Placement in Channels (for identically ranked DIMMs)	CPU 2 DIMM Placement in Channels (for identically ranked DIMMs)
1	(A1)	(A1)
2	(A1, E1)	(A1, E1)
4	(A1, C1); (E1, G1)	(A1, C1); (E1, G1)
6	(A1, C1); (D1, E1); (G1, H1)	(A1, C1); (D1, E1); (G1, H1)
8	(A1, C1); (D1, E1); (G1, H1); (B1, F1)	(A1, C1); (D1, E1); (G1, H1); (B1, F1)
12	(A1, C1); (D1, E1); (G1, H1); (A2, C2); (D2, E2); (G2, H2)	(A1, C1); (D1, E1); (G1, H1); (A2, C2); (D2, E2); (G2, H2)
16	(A1, B1); (C1, D1); (E1, F1); (G1, H1); (A2, B2); (C2, D2); (E2, F2); (G2, H2)	(A1, B1); (C1, D1); (E1, F1); (G1, H1); (A2, B2); (C2, D2); (E2, F2); (G2, H2)

NOTE: System performance is optimized when the DIMM type and quantity are equal for both CPUs, and when all channels are filled equally across the CPUs in the server.

Table 9 3200-MHz DIMM Memory Speeds with Different Intel® Xeon® Ice Lake® Processors

DIMM and CPU Frequencies (MHz)	DPC	LRDIMM (4Rx4)- 128 GB (MHz)	RDIMM (2Rx4) - 64 GB (MHz)	RDIMM (2Rx4) - 32 GB (MHz)	RDIMM (1Rx4) - 16 GB (MHz)
		1.2 V	1.2 V	1.2 V	1.2 V
DIMM = 3200 CPU = 3200	1DPC	3200	3200	3200	3200
	2DPC	3200	3200	3200	3200
DIMM = 3200 CPU = 2933	1DPC	2933	2933	2933	2933
	2DPC	2933	2933	2933	2933
DIMM = 3200 CPU = 2666	1DPC	2666	2666	2666	2666
	2DPC	2666	2666	2666	2666

DIMM Rules

- Allowed DIMM count for 1 CPU:
 - Minimum DIMM count = 1; Maximum DIMM count = 16
 - 1, 2, 4, 6, 8, 12, or 16 DIMMs allowed.
 - 3, 5, 7, 9, 10, 11, 13, 14, or 15 DIMMs not allowed.
- Allowed DIMM count for 2 CPUs:
 - Minimum DIMM count = 2; Maximum DIMM count = 32
 - 2, 4, 8, 12, 16, 24, or 32 DIMMs allowed.
 - 6, 10, 14, 18, 20, 22, 26, 28, or 30 DIMMs not allowed.
- DIMM Mixing:
 - Mixing different types of DIMM (RDIMM with LRDIMM) is not supported within a server.
 - Mixing RDIMM with RDIMM types is allowed, if they are mixed in same quantities, in a balanced configuration.
 - Mixing 16GB, 32GB, and 64GB RDIMMs is supported.
 - 128GB LRDIMMs cannot be mixed with other RDIMMs.

NOTE:

- DIMM mixing is not allowed when PMem are installed; in these cases, all DIMMs must be the same type and size.
- See the detailed mixing DIMM configurations at the following link [HX M6 Memory Guide](#)

STEP 6 SELECT DRIVE CONTROLLERS

The following list summarizes how drives are controlled on the server:

- SAS/SATA drives are controlled through a Cisco 12G SAS pass-through HBA.
- PCIe drives are controlled directly from the CPUs.

NOTE: Drive Controller are not supported in HXAF220C-M6SN (All NVMe) server node.

Cisco 12G SAS HBA

This HBA supports up to 10 SAS or SATA drives operating at 3 Gbs, 6 Gbs, and 12 Gbs. It supports JBOD or pass-through mode (not RAID) and plugs directly into a dedicated slot.

Select Drive Controller Options

Select the following:

- Cisco 12G SAS HBA (see [Table 10](#)).

Table 10 Hardware Controller Options

Product ID (PID)	PID Description
Controllers for Internal Drives	
Note that if the following Cisco 12G SAS HBA is selected, it is factory-installed in a dedicated slot.	
HX-SAS-220M6	Cisco 12G SAS HBA for (16 drives) w/1U Brkt <ul style="list-style-type: none"> ■ No RAID support ■ Supports up to 10 internal SAS HDDs and SAS/SATA SSDs ■ Supports JBOD or pass-through mode

Approved Configurations

- The Cisco 12G SAS HBA supports up to 10 internal drives with JBOD support.

STEP 7 SELECT DRIVES

The standard disk drive features are:

- 2.5-inch small form factor
- Hot-pluggable
- Drives come mounted in sleds

Select Drives - HXAF220C-M6SN (All NVMe)

The available drives are listed in [Table 11](#).

Data Center Deployment Mode

NOTE: HX Data Center without Fabric Interconnect (DC-no-FI) All NVMe - HXAF220C-M6SN require HXDP 5.0(1b) or higher.

* NOTE:

- HX 5.0(2b) supports the ability to handle inter-operability of mixed cache drives on HyperFlex All NVMe clusters with certain hardware configurations:
 - Existing cluster with 375G cache can be expanded with 1.6TB cache.
 - New cluster creation with heterogeneous cache drives needs two-step approach for a minimum of 4 node cluster; (Step 1) cluster creation with minimum three of lesser capacity 375GB cache, (Step 2) cluster expansion with 1.6TB cache. New heterogeneous cluster with less than three 375GB cache is not supported; Upgrade to homogenous cluster with 1.6TB cache is recommended in this scenario.
- For expansion of existing clusters or general information about interoperability of different drives, see [Cisco HyperFlex Drive Compatibility](#).

Table 11 Available Hot-Pluggable Sled-Mounted Drives

Product ID (PID)	PID Description	Drive Type	Capacity
Front Capacity Drive			
HX-NVME4-1920	1.9TB 2.5in U.2 15mm P5520 Hg Perf Med End NVMe (HyperFlex Release 5.0(2b) and later)	NVMe	1.9 TB
HX-NVME4-3840	3.8TB 2.5in U.2 15mm P5520 Hg Perf Med End NVMe (HyperFlex Release 5.0(2b) and later)	NVMe	3.8 TB
HX-NVME4-7680	7.6TB 2.5in U.2 15mm P5520 Hg Perf Med End NVMe (HyperFlex Release 5.0(2b) and later)	NVMe	7.6 TB

HX-NVMEI4-I7680	7.6TB 2.5in U.2 Intel P5500 NVMe High Perf Medium Endurance (HyperFlex Release 5.0(2b) and later)	NVMe	7.6 TB

Table 11 Available Hot-Pluggable Sled-Mounted Drives (continued)

Product ID (PID)	PID Description	Drive Type	Capacity
HX-NVMEM6-W15300	15.3TB 2.5in U.2 WD SN840 NVMe Extreme Perf. High Endurance (HyperFlex Release 5.0(2a) and later)	NVMe	15.3 TB
HX-NVME4-15360	15.3TB 2.5in U.2 15mm P5520 Hg Perf Med End NVMe (HyperFlex Release 5.0 (2b + Catalog) and later)	NVMe	15.3 TB
Front Cache Drive			
HX-NVMEXPB-I375*	375GB 2.5in Intel Optane NVMe Extreme Performance SSD (Mixed drive support with HyperFlex Release 5.0(2b))	NVMe	375 GB
HX-NVMEXP-I400	400GB 2.5in U.2 15mm P5800X Optane Ext Perf NVMe (30/100X) (HyperFlex Release 5.0(2b) and later)	NVMe	400 GB
HX-NVMEM6-W1600*	1.6TB 2.5in U.2 WD SN840 NVMe Extreme Perf. High Endurance (HyperFlex Release 5.0(2b); Mixed drive support available)	NVMe	1.6 TB
Front System Drive			
HX-NVME2H-I1000	Cisco 2.5" U.2 1,0 TB Intel P4510 NVMe High Perf. Value Endurance	NVMe	1.0 TB
HX-NVME4-1920	1.9TB 2.5in U.2 15mm P5520 Hg Perf Med End NVMe (HyperFlex Release 5.0(2b) and later)	NVMe	1.9 TB
Boot Drives			
HX-M2-240GB	240GB SATA M.2	SATA	240 GB
HX-M2-HWRAID	Cisco Boot optimized M.2 Raid controller		
<p>NOTE: Cisco uses solid state drives (SSDs) from a number of vendors. All solid state drives (SSDs) are subject to physical write limits and have varying maximum usage limitation specifications set by the manufacturer. Cisco will not replace any solid state drives (SSDs) that have exceeded any maximum usage specifications set by Cisco or the manufacturer, as determined solely by Cisco.</p>			

Approved Configurations

- Six to eight capacity drives

NOTE:

- For cluster scale related information please see the product [release notes](#)

- One cache drive
- One system drive
- One boot drive

NOTE:

- Order two identical M.2 SATA SSDs for the boot-optimized RAID controller. You cannot mix M.2 SATA SSD capacities.
- It is recommended that M.2 SATA SSDs be used as boot-only devices.
- The Boot-Optimized RAID controller supports VMWare, Windows and Linux Operating Systems.
- The minimum version of Cisco IMC and Cisco UCS Manager that supports this controller is 4.2(1) and later. The name of the controller in the software is MSTOR-RAID.
- CIMC/UCSM is supported for configuring of volumes and monitoring of the controller and installed SATA M.2 drives.
- The SATA M.2 drives can boot in UEFI mode only. Legacy boot mode is not supported.
- Hot-plug replacement is not supported. The server must be powered off.
- The boot-optimized RAID controller is supported when the server is used as a compute node in HyperFlex configurations.
- See [Figure 15 on page 73](#) for the location of the module connector on the motherboard. This connector accepts the boot-optimized RAID controller.

Caveats

- SED drives are not supported with HXAF220C-M6SN (All NVMe) server node.
- SFF NVMe drives are connected directly to CPU2, and are not managed by any drive controller.

Select Drives - HXAF220C-M6S (All Flash)

The available drives are listed in [Table 12](#)

Data Center Deployment Mode

NOTE: Data center deployment mode without fabric interconnect (HX-DC-no-FI) does not support SED drives. Refers to [STEP 2](#) for the details.

* NOTE:

- HX 5.0(2b) supports the ability to handle inter-operability of mixed cache drives on HyperFlex All Flash clusters with certain hardware configurations:
 - Existing cluster with 375G cache can be expanded with 1.6TB cache.
 - New cluster creation with heterogeneous cache drives needs two-step approach for a minimum of 4 node cluster; **(Step 1)** cluster creation with minimum three of lesser capacity 375GB cache, **(Step 2)** cluster expansion with 1.6TB cache. New heterogeneous cluster with less than three 375GB cache is not supported; Upgrade to homogenous cluster with 1.6TB cache is recommended in this scenario.
- For expansion of existing clusters or general information about interoperability of different drives, see [Cisco HyperFlex Drive Compatibility](#).

<p>NOTE: Cisco uses solid state drives (SSDs) from a number of vendors. All solid state drives (SSDs) are subject to physical write limits and have varying maximum usage limitation specifications set by the manufacturer. Cisco will not replace any solid state drives (SSDs) that have exceeded any maximum usage specifications set by Cisco or the manufacturer, as determined solely by Cisco.</p>			

Approved Configurations

- Six to eight capacity drives

NOTE:

- Less than six capacity drives is supported only for HX Edge configuration.
- For cluster scale related information please see the product [release notes](#)

- One cache drive

NOTE:

- SED cache drive can only be selected if you have selected SED capacity drives.
- When configuring front facing drives with NVMe drives, you must order an NVMe cable (PID = CBL-FNVME-220M6) along with the drives.

- One system drive
- One boot drive

NOTE:

- Order two identical M.2 SATA SSDs for the boot-optimized RAID controller. You cannot mix M.2 SATA SSD capacities.
- It is recommended that M.2 SATA SSDs be used as boot-only devices.
- The Boot-Optimized RAID controller supports VMWare, Windows and Linux Operating Systems.
- The minimum version of Cisco IMC and Cisco UCS Manager that supports this controller is 4.2(1) and later. The name of the controller in the software is MSTOR-RAID.
- CIMC/UCSM is supported for configuring of volumes and monitoring of the controller and installed SATA M.2 drives.
- The SATA M.2 drives can boot in UEFI mode only. Legacy boot mode is not supported.
- Hot-plug replacement is not supported. The server must be powered off.
- The boot-optimized RAID controller is supported when the server is used as a compute node in HyperFlex configurations.
- See [Figure 15 on page 73](#) for the location of the module connector on the motherboard. This connector accepts the boot-optimized RAID controller.

Caveats

- SED drives can not be mixed with the non-SED drives.

Select Drives - HX220C-M6S (Hybrid)

The available drives are listed in [Table 13](#).

Data Center Deployment Mode

NOTE: Data center deployment mode without fabric interconnect (HX-DC-no-FI) does not support SED drives. Refers to [STEP 2](#) for the details.

Table 13 Available Hot-Pluggable Sled-Mounted Drives

Product ID (PID)	PID Description	Drive Type	Capacity
Front Capacity Drive			
HX-HD12TB10K12N	1.2TB 12G SAS 10K RPM SFF HDD	SAS	1.2 TB
HX-HD18TB10K4KN	1.8TB 12G SAS 10K RPM SFF HDD (4K)	SAS	1.8 TB
HX-HD24TB10K4KN	2.4TB 12G SAS 10K RPM SFF HDD (4K)	SAS	2.4 TB
Front SED Capacity Drive			
HX-HD12T10NK9	1.2TB 12G SAS 10K RPM SFF HDD (SED)	SAS	1.2 TB
HX-HD24T10NK9	2.4TB 12G SAS 10K RPM SFF HDD (SED)	SAS	2.4 TB
Front Cache Drive			
HX-SD480G63X-EP	480GB 2.5in Enterprise Performance 6G SATA SSD(3X endurance)	SATA	480 GB
HX-SD800GK3X-EP	800GB 2.5in Enterprise Performance 12G SAS SSD(3X endurance)	SAS	800 GB
Front SED Cache Drive			
HX-SD800GBKNK9	800GB Enterprise Performance SAS SSD (3X FWPD, SED)	SAS	800 GB
Front System Drive			
HX-SD240GM1X-EV	240GB 2.5 inch Enterprise Value 6G SATA SSD	SATA	240 GB
Boot Drives			
HX-M2-240GB	240GB SATA M.2	SATA	240 GB
HX-M2-HWRAID	Cisco Boot optimized M.2 Raid controller		
<p>NOTE: Cisco uses solid state drives (SSDs) from a number of vendors. All solid state drives (SSDs) are subject to physical write limits and have varying maximum usage limitation specifications set by the manufacturer. Cisco will not replace any solid state drives (SSDs) that have exceeded any maximum usage specifications set by Cisco or the manufacturer, as determined solely by Cisco.</p>			

Approved Configurations

- Six to eight capacity drives

NOTE:

- Less than six capacity drives is supported only for HX Edge configuration.
- For cluster scale related information please see the product [release notes](#)
- All SED HDDs are FIPs 140-2 compliant

- One cache drive

NOTE:

- SED cache drive can only be selected if you have selected SED capacity drives.

- One system drive
- One boot drive

NOTE:

- Order two identical M.2 SATA SSDs for the boot-optimized RAID controller. You cannot mix M.2 SATA SSD capacities.
- It is recommended that M.2 SATA SSDs be used as boot-only devices.
- The Boot-Optimized RAID controller supports VMWare, Windows and Linux Operating Systems.
- The minimum version of Cisco IMC and Cisco UCS Manager that supports this controller is 4.2(1) and later. The name of the controller in the software is MSTOR-RAID.
- CIMC/UCSM is supported for configuring of volumes and monitoring of the controller and installed SATA M.2 drives.
- The SATA M.2 drives can boot in UEFI mode only. Legacy boot mode is not supported.
- Hot-plug replacement is not supported. The server must be powered off.
- The boot-optimized RAID controller is supported when the server is used as a compute node in HyperFlex configurations.
- See [Figure 15 on page 73](#) for the location of the module connector on the motherboard. This connector accepts the boot-optimized RAID controller.

Caveats

- SED drives can not be mixed with the non-SED drives.

STEP 8 SELECT HYPERFLEX CONNECTIVITY MODE

Starting with HyperFlex 5.0(2a), the following two Connectivity options are supported

Select Connectivity mode

The available connectivity modes are listed in [Table 14](#)

Table 14 Connectivity Modes

Product ID (PID)	Description
HX-VIC-MODE	Hyperflex VIC Connectivity Mode
HX-NIC-MODE ¹	Hyperflex NIC Connectivity Mode

Notes:

1. Selection of Deployment Mode Option (HX-DC-NO-FI) is required for the NIC Connectivity Mode. Minimum 4 NIC Ports required, If NIC mode is selected and Double-Wide GPU is selected from R2 Slot5 x16, then must select quad port PID from R2 Slot 4 x8 PCIe NIC option and cannot make selection from R2 Slot 6 x8 PCIe NIC Option.

Table 15 Available Cards for the Connectivity Modes

Product ID (PID)	Description
HyperFlex VIC Connectivity Mode	
HX-M-V25-04	Cisco UCS VIC 1467 quad port 10/25G SFP28 mLOM
HX-M-V100-04	Cisco UCS VIC 1477 dual port 40/100G QSFP28 mLOM
HyperFlex NIC Connectivity Mode	
R2 Slot 4 x8 PCIe NIC	
HX-PCIE-ID10GF	Intel X710 dual-port 10G SFP+
HX-PCIE-IQ10GF	Intel X710 quad-port 10G SFP+ NIC
HX-P-I8D25GF	Cisco-Intel E810XXVDA2 2x25/10 GbE SFP28 PCIe NIC
R2 Slot 6 x8 PCIe NIC	
HX-PCIE-ID10GF	Intel X710 dual-port 10G SFP+
HX-PCIE-IQ10GF	Intel X710 quad-port 10G SFP+ NIC
HX-P-I8D25GF	Cisco-Intel E810XXVDA2 2x25/10 GbE SFP28 PCIe NIC

STEP 9 SELECT OPTION CARD(s)

The standard PCIe card offerings are:

- Modular LAN on Motherboard (mLOM).
- Virtual Interface Cards (VICs).
- Network Interface Cards (NICs).

Select Option Cards

The available option cards are listed in [Table 16](#).

Data Center Deployment Mode

NOTE:

- Data center deployment mode without fabric interconnect (HX-DC-no-FI) does not support HX-PCIE-C25Q-04 and HX-PCIE-OFFLOAD-1. Refer to [STEP 2](#) for the details.
- HX-M-V100-04 require HXDP 4.5(2c) or higher for data center deployment mode without fabric interconnect (DC-no-FI).

Table 16 Available PCIe Option Cards

Product ID (PID)	PID Description	Location	Card Size ¹
Virtual Interface Card (VICs)			
HX-PCIE-C100-04	Cisco UCS VIC 1495 Dual Port 40/100G QSFP28 CNA PCIe	Riser 1 or 3	HHHL, SS
HX-PCIE-C25Q-04	Cisco UCS VIC 1455 Quad Port 10/25G SFP28 PCIe	Riser 1 or 3	HHHL, SS
Network Interface Cards (NICs)			
1 Gb NICs			
HX-PCIE-IRJ45	Intel i350 Quad Port 1Gb Adapter	Riser 1, 2, or 3	HHHL, SS
10 Gb NICs			
HX-PCIE-ID10GF	Intel X710-DA2 Dual Port 10Gb SFP+ NIC	Riser 1, 2, or 3	HHHL, SS
HX-PCIE-IQ10GF	Intel X710 Quad Port 10G SFP+ NIC	Riser 1, 2, or 3	HHHL, SS
HX-P-ID10GC	Cisco-Intel X710T2LG 2x10 GbE RJ45 PCIe NIC	Riser 1, 2 or 3	HHHL, SS
25 Gb NICs			
HX-P-I8D25GF	Cisco-Intel E810XXVDA2 2x25/10 GbE SFP28 PCIe NIC	Riser 1, 2, or 3	HHHL, SS
HX-P-I8Q25GF ²	Cisco-Intel E810XXVDA4L 4x25/10 GbE SFP28 PCIe NIC	Riser 1 or 2	FHHL, SS
HX PCIe Accel Engine^{3,4}			
HX-PCIE-OFFLOAD-1 ⁵	Application Acceleration Engine	Riser 1, 2, or 3	HHHL, SS

Notes:

1. HHHL = half-height, half-length; FHHL = full-height, half-length; SS = single-slot; DS = double-slot.
2. If HX-P-I8Q25GF selected then HX-GPURKIT-C220 PID must be selected

3.
 - Every node in an HX cluster must use **HX-PCIE-OFFLOAD-1** card
 - Optional card offloads the compression functionality to HW acceleration card. HX-PCIE-OFFLOAD-1 uses a more computationally intensive compression algorithm. This results in lower storage space and frees up CPU cycle.
 - HXDP Enterprise licenses are required.
 - HX-PCIE-OFFLOAD-1 works with all HXDP features, including Stretched Cluster, SED drives and more
4. Please note that, HX-PCIE-OFFLOAD-1 is on Compliance Hold Review, for details contact: hx-order-compliance-hold@cisco.com
5. HX-PCOL-SHRTBRKT is auto included, if HX-PCIE-OFFLOAD is selected from Riser 1, 2 and/or 3 HH x16 Slot.

NOTE: Use of 10GE PCI card is not allowed with 6300 Series FI.

Approved Configurations

(1) 1-CPU Systems

- You can select up to one of the PCIe option cards listed in [Table 16](#) to be installed in Riser 1. Riser 1 is controlled by CPU 1. Risers 2 and 3 are not installed in a 1-CPU system.

(2) 2-CPU Systems

- You can select up to two of the PCIe option cards listed in [Table 16](#) for a two-riser system (Riser 1 and Riser 2 installed) and up to three of the PCIe option cards for a three-riser system (Riser 1, Riser 2, and Riser 3 installed). Risers 1 and 2 are controlled by CPU 1 and riser 3 is controlled by CPU 2.

Caveats

- For 1-CPU systems:
 - Only Riser 1 is supported.
 - Only a single plug-in PCIe VIC card is supported and must be installed in Riser 1. However, in addition to the one PCIe VIC card, you can also choose to install an mLOM VIC card in the mLOM slot at the rear of the chassis.
- For 2-CPU systems:
 - All risers (Risiers 1, 2, and 3) are supported.
 - Two plug-in PCIe VIC cards can be installed in 2-CPU systems, using risers 1 and 3. In addition, you can order an mLOM VIC card, which is installed in the mLOM slot at the rear of the chassis and thus have three VIC cards in operation at the same time. See [Table 16 on page 41](#) for the selection of plug-in and mLOM VIC cards.
 - To help ensure that your operating system is compatible with the card you have selected, or to see additional cards that have been qualified to work with the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes, but are not sold on the Cisco pricelist, check the Hardware Compatibility List at this URL:

http://www.cisco.com/en/US/products/ps10477/prod_technical_reference_list.html

STEP 10 ORDER OPTIONAL PCIe OPTION CARD ACCESSORIES

- For list of supported optics and cables for VIC 1455, VIC 1495, VIC 1467 and VIC 1477. refer to the VIC 1400 series data sheets at the following link:
 - <https://www.cisco.com/c/en/us/products/collateral/interfaces-modules/unified-computing-system-adapters/datasheet-c78-741130.html>

Select

- NIC Interoperability with Cisco Cables/Optics (*Table 17 & Table 18 on page 44*).
- NIC Interoperability with Intel Cables/Optics (*Table 19 on page 45*).

Table 17 10G NIC Interoperability with Cisco Cables/Optics

Speed White Paper	45000 series Interoperability Matrix	

STEP 11 ORDER GPU CARDS (OPTIONAL)

Select GPU Options

The available GPU PCIe options are listed in [Table 20](#).

Table 20 Available PCIe GPU Cards¹

Product ID (PID)	PID Description	Card Size	Maximum cards Per node
HX-GPU-T4-16	NVIDIA T4 PCIE 75W 16GB	HHHL, single-wide	3

Notes:

1. Refer to https://www.cisco.com/content/en/us/td/docs/unified_computing/ucs/c/hw/c220m6/install/c220m6.html for more details.

NOTE:

- All GPU cards must be procured from Cisco as there is a unique SBIOS ID required by CIMC and UCSM.

Caveats

- GPUs cannot be mixed.
- For the maximum of 3x T4 GPUs, the 3x half slot riser should be selected.
- A GPU can be installed in either full-height PCIe riser 1 or 2 (or both) or three half-height riser 1, 2, or 3.

STEP 12 ORDER POWER SUPPLY

Power supplies share a common electrical and physical design that allows for hot-plug and tool-less installation into M6 HX-series servers. Each power supply is certified for high-efficiency operation and offers multiple power output options. This allows users to “right-size” based on server configuration, which improves power efficiency, lowers overall energy costs and avoids stranded capacity in the data center. Use the power calculator at the following link to determine the needed power based on the options chosen (CPUs, drives, memory, and so on):

<http://ucspowercalc.cisco.com>

WARNING:

- Starting 1st January 2024, only Titanium rated PSUs are allowed to be shipped to European Union (EU), European Economic Area (EEA), United Kingdom (UK), Switzerland and other countries that adopted Lot 9 Regulation.
- DC PSUs are not impacted by Lot 9 Regulation and are EU/UK Lot 9 compliant

Table 21 Power Supply

Product ID (PID)	PID Description
PSU (Input High Line 210VAC)	
HX-PSU1-1050W	1050W AC PSU Platinum (Not EU/UK Lot 9 Compliant)
HX-PSUV2-1050DC	1050W -48V DC Power Supply for Rack Server
HX-PSU1-1600W	1600W AC PSU Platinum (Not EU/UK Lot 9 Compliant)
HX-PSU1-2300W ¹	2300W AC Power Supply for Rack Servers Titanium
PSU (Input Low Line 110VAC)	
HX-PSU1-1050W	1050W AC PSU Platinum (Not EU/UK Lot 9 Compliant)
HX-PSUV2-1050DC	1050W -48V DC Power Supply for Rack Server
HX-PSU1-2300W	2300W AC Power Supply for Rack Servers Titanium
HX-PSU1-1050ELV	1050W AC PSU Enhanced Low Line (Not EU/UK Lot 9 Compliant)

Notes:

1. The 2300 W power supply uses a different power connector than the rest of the power supplies, so you must use different power cables to connect it. See [Table 22 on page 48](#) and [Table 23 on page 51](#).

NOTE: In a server with two power supplies, both power supplies must be identical.

STEP 13 SELECT INPUT POWER CORD(S)

Using [Table 22](#) and [Table 23](#), select the appropriate AC power cords. You can select a minimum of no power cords and a maximum of two. If you select the option R2XX-DMYPWRCORD, no power cord is shipped with the server.

NOTE: [Table 22](#) lists the power cords for servers that use power supplies less than 2300 W. [Table 23](#) lists the power cords for servers that use 2300 W power supplies. Note that the power cords for 2300 W power supplies use a C19 connector so they only fit the 2300 W power supply connector.

Table 22 Available Power Cords (for server PSUs less than 2300 W)

Product ID (PID)	PID Description	Images
NO-POWER-CORD	ECO friendly green option, no power cable will be shipped	
R2XX-DMYPWRCORD	No power cord (dummy PID to allow for a no power cord option)	Not applicable
CAB-48DC-40A-8AWG	C-Series -48VDC PSU Power Cord, 3.5M, 3 Wire, 8AWG, 40A	
CAB-N5K6A-NA	Power Cord, 200/240V 6A, North America	
CAB-AC-L620-C13	AC Power Cord, NEMA L6-20 - C13, 2M/6.5ft	
CAB-C13-CBN	CABASY,WIRE,JUMPER CORD, 27" L, C13/C14, 10A/250V

CAB-US620P-C19-US	NEMA 6-20 to IEC-C19 13ft US	Image not available

STEP 14 ORDER TOOL-LESS RAIL KIT AND OPTIONAL REVERSIBLE CABLE MANAGEMENT ARM

Select a Tool-less Rail Kit

Select a tool-less rail kit from [Table 24](#).

Table 24 Tool-less Rail Kit Options

Product ID (PID)	PID Description
HX-RAIL-M6	Ball Bearing Rail Kit for C220 and C240 M6 rack servers

NOTE: Cisco recommends a minimum quantity of 1 Rail Kit.

Select an Optional Reversible Cable Management Arm

The reversible cable management arm mounts on either the right or left slide rails at the rear of the server and is used for cable management. Use [Table 25](#) to order a cable management arm.

Table 25 Cable Management Arm

Product ID (PID)	PID Description
HX-CMA-C220M6	Reversible CMA for C220 M6 ball bearing rail kit

For more information about the tool-less rail kit and cable management arm, see the Cisco M5 Installation and Service Guide at this URL:

https://www.cisco.com/content/en/us/td/docs/unified_computing/ucs/c/hw/c220m6/install/c220m6.html

NOTE: If you plan to rackmount your HX220C M6 All NVMe/All Flash/Hybrid Server Nodes, you must order a tool-less rail kit. The same rail kits and CMAs are used for M5 and M6 servers.

STEP 15 ORDER SECURITY DEVICES (OPTIONAL)

A Trusted Platform Module (TPM) is a computer chip (microcontroller) that can securely store artifacts used to authenticate the platform (server). These artifacts can include passwords, certificates, or encryption keys. A TPM can also be used to store platform measurements that help ensure that the platform remains trustworthy. Authentication (ensuring that the platform can prove that it is what it claims to be) and attestation (a process helping to prove that a platform is trustworthy and has not been breached) are necessary steps to ensure safer computing in all environments.

A chassis intrusion switch gives a notification of any unauthorized mechanical access into the server.

The security device ordering information is listed in [Table 26](#).

Table 26 Security Devices

Product ID (PID)	PID Description
HX-TPM-002C	TPM 2.0, TCG, FIPS140-2, CC EAL4+ Certified, for M6 servers
HX-INT-SW02	C220 and C240 M6 Chassis Intrusion Switch
UCSX-TPM-OPT-OUT	OPT OUT, TPM 2.0, TCG, FIPS140-2, CC EAL4+ Certified ¹

Notes:

1. Please note that Microsoft certification requires a TPM 2.0 for bare-metal or guest VM deployments. Opt-out of the TPM 2.0 voids the Microsoft certification

NOTE:

- The TPM module used in this system conforms to TPM 2.0, as defined by the Trusted Computing Group (TCG). It is also SPI-based.
- TPM installation is supported after-factory. However, a TPM installs with a one-way screw and cannot be replaced, upgraded, or moved to another server. If a server with a TPM is returned, the replacement server must be ordered with a new TPM.

STEP 16 SELECT LOCKING SECURITY BEZEL (OPTIONAL)

An optional locking bezel can be mounted to the front of the chassis to prevent unauthorized access to the drives.

Select the locking bezel from [Table 27](#).

Table 27 Locking Bezel Options for HX220C M6 All NVMe/All Flash/Hybrid Server Nodes

Product ID (PID)	Description
HXAF220C-BZL-M5SN	HXAF220C M5 All NVMe Security Bezel
HXAF220C-BZL-M5S	HXAF220C M5 Security Bezel
HX220C-BZL-M5	HX220C M5 Security Bezel

STEP 17 SELECT HOST OPERATING SYSTEM

Select Microsoft Windows operating system as desired from [Table 28](#)

NOTE:

- **VMware ESXi Hypervisor** - We no longer ship VMWare ESXi from the factory. Refer to this link for the further details.
https://www.cisco.com/c/en/us/td/docs/hyperconverged_systems/HyperFlex_HX_DataPlatformSoftware/BroadcomAgreementNotice/b-broadcom-terminated-vmware-embedded-agreement.html
- **Microsoft operating system** - Optional guest OS licenses that may be purchased to run on top of the hypervisor.

Table 28 Host Operation System

Product ID (PID)	PID Description
Operating system	
Microsoft Options	
HX-MSWS-22-ST16C	Windows Server 2022 Standard (16 Cores/2 VMs)
HX-MSWS-22-DC16C	Windows Server 2022 Data Center (16 Cores/Unlimited VMs)

STEP 18 SELECT HYPERFLEX DATA PLATFORM (HXDP) SOFTWARE

HyperFlex Data Platform Edition & Subscription Period options are available as follows. Select as desired from [Table 29](#).

Table 29 HX Data Platform Software

Product ID (PID)	PID Description
HXDP-DC-AD	HyperFlex Data Platform Data center Advantage (1 to 5) Yr
HXDP-DC-PR	HyperFlex Data Platform Data center Premier (1 to 5) Yr
Cisco HyperFlex Data Platform Software - SLR	
HXDP-DC-AD-SLR	HyperFlex Data Platform Data center Advantage SLR (1 to 5) Yr
HXDP-DC-PR-SLR	HyperFlex Data Platform Data center Premier SLR (1 to 5) Yr
Cisco HyperFlex Data Platform Software Support	
SVS-DCM-SUPT-BAS	Basic Support for DCM
SVS-SSTCS-DCMGMT	Solution Support for DC Mgmt
SVS-L1DCS-HXDP	CXL1 for HXDP
SVS-L2DCS-HXDP	CXL2 for HXDP

STEP 19 CISCO INTERSIGHT

Cisco Intersight™ is a Software-as-a-Service (SaaS) hybrid cloud operations platform which delivers intelligent automation, observability, and optimization to customers for traditional and cloud-native applications and infrastructure. Select as desired from [Table 30](#).

Table 30 Cisco Intersight

Product ID (PID)	PID Description
Cisco Intersight - SaaS	
DC-MGT-SAAS-EST-C	Cisco Intersight SaaS - Essentials (1 to 5) Yr
DC-MGT-SAAS-AD-C	Cisco Intersight SaaS - Advantage (new) (1 to 5) Yr
DC-MGT-SAAS-PR-C	Cisco Intersight SaaS - Premier (1 to 5) Yr
Cisco Intersight - Connected Virtual Appliance	
DC-MGT-ONPREM-EST	Cisco Intersight Connected Virtual Appliance - Essentials (1 to 5) Yr
DC-MGT-VAPP-AD	Cisco Intersight Connected Virtual Appliance - Advantage (1 to 5) Yr
DC-MGT-VAPP-PR	Cisco Intersight Connected Virtual Appliance - Premier (1 to 5) Yr
Cisco Intersight - Private Virtual Appliance	
DC-MGT-PVAPP-EST	Cisco Intersight Private Virtual Appliance - Essentials (1 to 5) Yr
DC-MGT-PVAPP-AD	Cisco Intersight Private Virtual Appliance - Advantage (1 to 5) Yr
DC-MGT-PVAPP-PR	Cisco Intersight Private Virtual Appliance - Premier (1 to 5) Yr
Cisco Intersight Support	
SVS-DCM-SUPT-BAS	Basic Support for DCM
SVS-SSTCS-DCMGMT	Solution Support for DC Mgmt
SVS-L1DCS-INTER	CXL1 for INTERSIGHT
SVS-L2DCS-INTER	CXL2 for INTERSIGHT

STEP 20 SELECT INSTALLATION SERVICE

Customers can purchase Cisco Advanced Services (AS). Select as desired from [Table 31](#).

Table 31 Installation services

Product ID (PID)	PID Description
Cisco Advanced Services	
ASF-ULT2-HPF-QSS	Quick Start Services - 1 Week
ASF-ULT2-HPF-ADS	Accelerated Deployment Services - 2 Weeks
AS-DCN-CNSLT	Advanced Services Consulting

STEP 21 SELECT SERVICE and SUPPORT LEVEL

A variety of service options are available, as described in this section.

HyperFlex Warranty, No Contract

If you have noncritical implementations and choose to have no service contract, the following coverage is supplied:

- Three-year parts coverage.
- Next business day (NBD) onsite parts replacement eight hours a day, five days a week.
- 90-day software warranty on media.
- Ongoing downloads of BIOS, drivers, and firmware updates.
- UCSM updates for systems with Unified Computing System Manager. These updates include minor enhancements and bug fixes that are designed to maintain the compliance of UCSM with published specifications, release notes, and industry standards.

Smart Net Total Care (SNTC)

For support of the entire HyperFlex System, Cisco offers the Cisco Smart Net Total Care Service. This service provides expert software and hardware support to help sustain performance and high availability of the unified computing environment. Access to Cisco Technical Assistance Center (TAC) is provided around the clock, from anywhere in the world.

For systems that include Unified Computing System Manager, the support service includes downloads of UCSM upgrades. The Cisco Smart Net Total Care Service includes flexible hardware replacement options, including replacement in as little as two hours. There is also access to Cisco's extensive online technical resources to help maintain optimal efficiency and uptime of the unified computing environment. For more information please refer to the following url: <http://www.cisco.com/c/en/us/services/technical/smart-net-total-care.html?stickynav=1>

You can choose a desired service listed in [Table 32](#).

Table 32 SNTC Service (PID HXAF220C-M6SN)

Smart Net Total Care Onsite Troubleshooting Service

An enhanced offer over traditional Smart Net Total Care which provides onsite troubleshooting expertise to aid in the diagnostics and isolation of hardware issue within our customers’ Cisco HyperFlex System environment. It is delivered by a Cisco Certified field engineer (FE) in collaboration with remote TAC engineer and Virtual Internetworking Support Engineer (VISE).

You can choose a desired service listed in [Table 33](#).

***Includes Local Language Support and Drive Retention - Only available in China and Japan

Solution Support (SSPT)

Solution Support includes both Cisco product support and solution-level support, resolving complex issues in multivendor environments, on average, 43% more quickly than product support alone. Solution Support is a critical element in data center administration, to help rapidly resolve any issue encountered, while maintaining performance, reliability, and return on investment.

This service centralizes support across your multivendor Cisco environment for both our products and solution partner products you've deployed in your ecosystem. Whether there is an issue with a Cisco or solution partner product, just call us. Our experts are the primary point of contact and own the case from first call to resolution. For more information please refer to the following url:

<http://www.cisco.com/c/en/us/services/technical/solution-support.html?stickynav=1>

You can choose a desired service listed in [Table 34](#).

Smart Net Total Care Hardware Only Service

For faster parts replacement than is provided with the standard Cisco HyperFlex warranty, Cisco offers the Cisco Smart Net Total Care Hardware Only Service. You can choose from two levels of advanced onsite parts replacement coverage in as little as four hours. Smart Net Total Care Hardware Only Service provides remote access any time to Cisco support professionals who can determine if a return materials authorization (RMA) is required.

You can choose a desired service listed in [Table 36](#).

Partner Support Service

Cisco Partner Support Service (PSS) is a Cisco Collaborative Services service offering that is designed for partners to deliver their own branded support and managed services to enterprise customers. Cisco PSS provides partners with access to Cisco's support infrastructure and assets to help them:

- Expand their service portfolios to support the most complex network environments
- Lower delivery costs
- Deliver services that increase customer loyalty

PSS options enable eligible Cisco partners to develop and consistently deliver high-value technical support that capitalizes on Cisco intellectual assets. This helps partners to realize higher margins and expand their practice.

PSS is available to all Cisco PSS partners.

The two Partner Support Options include:

- Partner Support Service for HyperFlex
- Partner Support Service for HyperFlex Hardware Only

PSS provides hardware and software support, including triage support for third party software, backed by Cisco technical resources and level three support.

You can choose a desired service listed in [Table 37](#).

Table 37 PSS Service (PID HXAF220C-M6SN)

Combined Support Service

Combined Services makes it easier to purchase and manage required services under one contract. SNTC services help increase the availability of your vital data center infrastructure and realize the most value from your unified computing investment. The more benefits you realize from the Cisco HyperFlex System, the more important the technology becomes to your business. These services allow you to:

- Optimize the uptime, performance, and efficiency of your HyperFlex system
- Protect your vital business applications by rapidly identifying and addressing issues
- Strengthen in-house expertise through knowledge transfer and mentoring
- Improve operational efficiency by allowing HyperFlex experts to augment your internal staff resources
- Enhance business agility by diagnosing potential issues before they affect your operations

You can choose a desired service listed in [Table 40](#).

Table 40 Combined Support Service (PID HXAF220C-M6SN)

For PID HX220C-M6S, select Service SKU with HX220CMS suffix (Example: CON-NCF4P-HX220CMS)			

Drive Retention Service

With the Cisco Drive Retention Service, you can obtain a new disk drive in exchange for a faulty drive without returning the faulty drive.

Sophisticated data recovery techniques have made classified, proprietary, and confidential information vulnerable, even on malfunctioning disk drives. The Drive Retention service enables you to retain your drives and ensures that the sensitive data on those drives is not compromised, which reduces the risk of any potential liabilities. This service also enables you to comply with regulatory, local, and federal requirements.

If your company has a need to control confidential, classified, sensitive, or proprietary data, you might want to consider one of the Drive Retention Services listed in the above tables (where available)

NOTE: Cisco does not offer a certified drive destruction service as part of this service.

Local Language Technical Support

Where available, and subject to an additional fee, local language support for calls on all assigned severity levels may be available for specific product(s) - see tables above.

For a complete listing of available services for Cisco Unified Computing System, see the following URL:

http://www.cisco.com/en/US/products/ps10312/serv_group_home.html

SUPPLEMENTAL MATERIAL

Hyperconverged Systems

Cisco HyperFlex Systems let you unlock the full potential of hyperconvergence and adapt IT to the needs of your workloads. The systems use an end-to-end software-defined infrastructure approach, combining software-defined computing in the form of Cisco HyperFlex HX-Series nodes; software-defined storage with the powerful Cisco HX Data Platform; and software-defined networking with the Cisco UCS fabric that will integrate smoothly with Cisco Application Centric Infrastructure (Cisco ACI). Together with a single point of connectivity and management, these technologies deliver a preintegrated and adaptable cluster with a unified pool of resources that you can quickly deploy, adapt, scale, and manage to efficiently power your applications and your business.

Figure 9 & Figure 10 show a small footprint cluster.

Figure 9 Small Footprint Cluster Using HX220C M6 All NVMe/All Flash/Hybrid Server Nodes With Data Center Fabric Interconnect Deployment Mode.

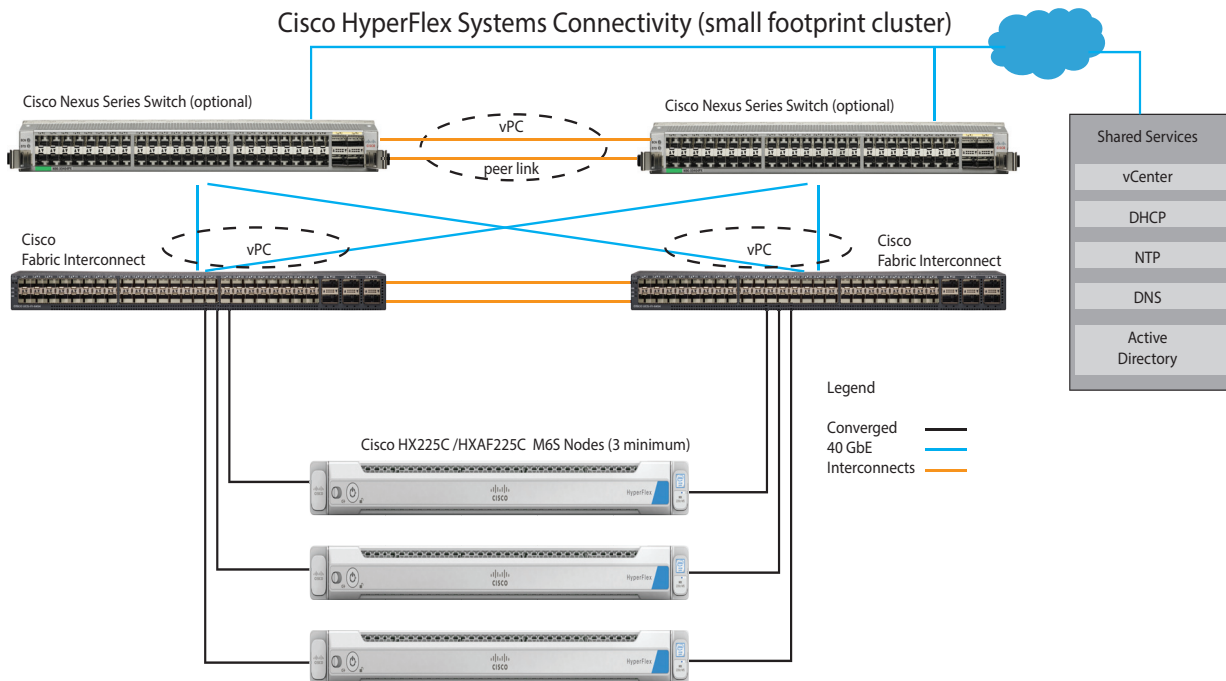

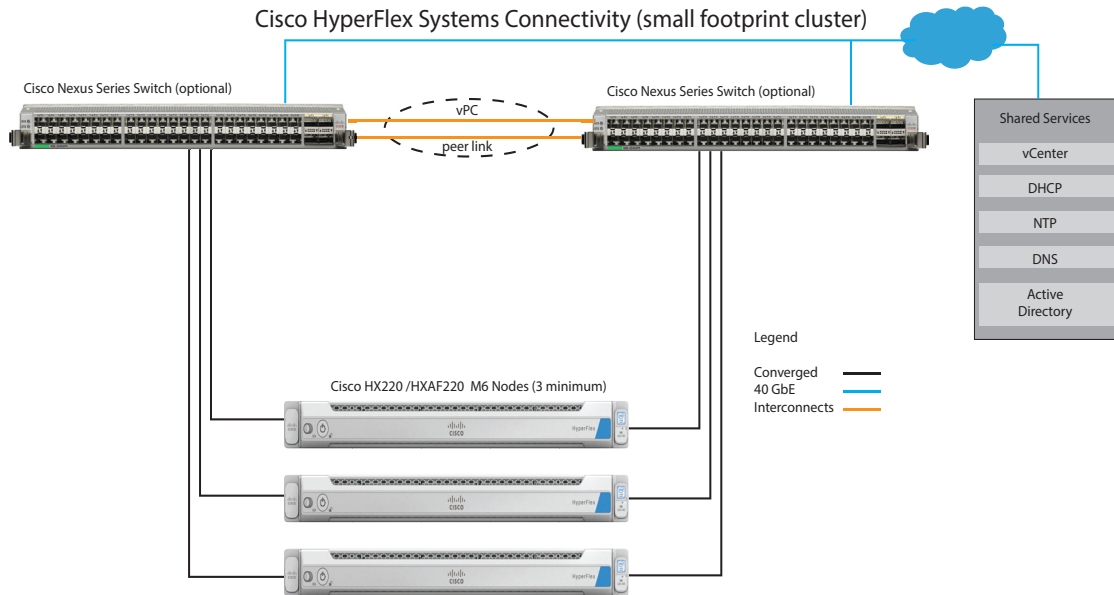

Figure 10 Small Footprint Cluster Using HX220C M6 All Flash/Hybrid Server Nodes Data Center Without Fabric Interconnect Deployment Mode.

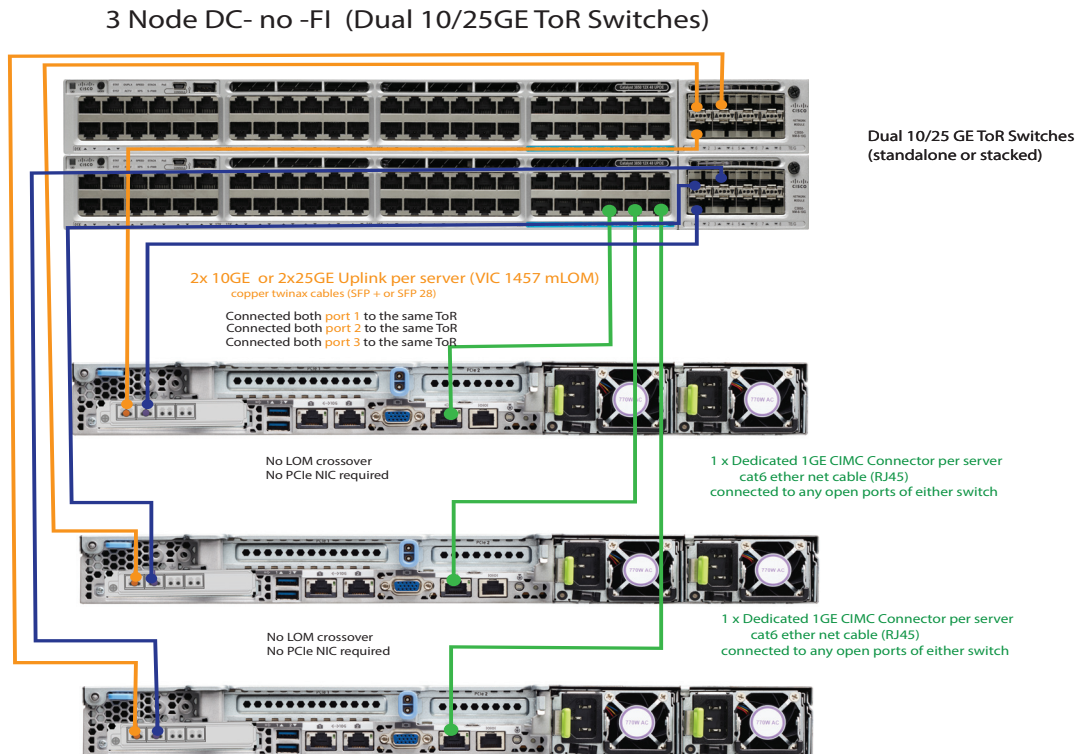

10 or 25 Gigabit Ethernet Dual Switch Topology

Dual switch configuration provides a slightly more complex topology with full redundancy that protects against: switch failure, link failure, and port failure. It requires two switches that may be standalone or stacked, and two 10/25GE ports, one 1GE port for CIMC management, and one Cisco VIC 1467 per server. Trunk ports are the only supported network port configuration. refer [10/25 Gigabit Ethernet Switch Configuration Guidelines](#) for more information.

To deploy this topology, select from [STEP 2](#)

Figure 11 Physical cabling for the 10/25GE Dual Switch Topology. Detailed diagrams for network topologies can be found in the [pre-installation checklist](#).

NIC Based 10 or 25 Gigabit Ethernet Dual Switch Topology (quad port)

Dual switch configuration provides a slightly more complex topology with full redundancy that protects against: switch failure, link failure, and port failure. It requires two switches that may be standalone or stacked, and four 10/25GE ports, one 1GE port for CIMC management, and 1 x quad port NIC per server. Trunk ports are the only supported network port configuration. refer [10/25 Gigabit Ethernet Switch Configuration Guidelines](#) for more information.

To deploy this topology, select connectivity mode from [Table 14](#).

Figure 12 Physical cabling for the Quad Port NIC Based 10/25GE Dual Switch Topology.

3 or greater Node Edge/DC-no-FI - Dual 10/25GE

NIC Based 10 or 25 Gigabit Ethernet Dual Switch Topology (dual port)

Dual switch configuration provides a slightly more complex topology with full redundancy that protects against: switch failure, link failure, and port failure. It requires two switches that may be standalone or stacked, and four 10/25GE ports, one 1GE port for CIMC management, and 2 x dual port NIC per server. Trunk ports are the only supported network port configuration. refer [10/25 Gigabit Ethernet Switch Configuration Guidelines](#) for more information.

To deploy this topology, select connectivity mode from [Table 14](#).

Figure 17 shows three half-height risers plugged into their respective connectors.

Figure 17 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes with three half-height risers plugged In HX220M6 Motherboard

Figure 18 shows two full-height risers plugged in. Note that riser 1 is plugged into the riser 1 connector and riser 2 is plugged into the riser 3 connector. Riser 2 connector is not used.

Figure 18 HX220 M6 All NVMe/All Flash/Hybrid With Two Full-Height Risers Plugged In
HX220 M6 Motherboard

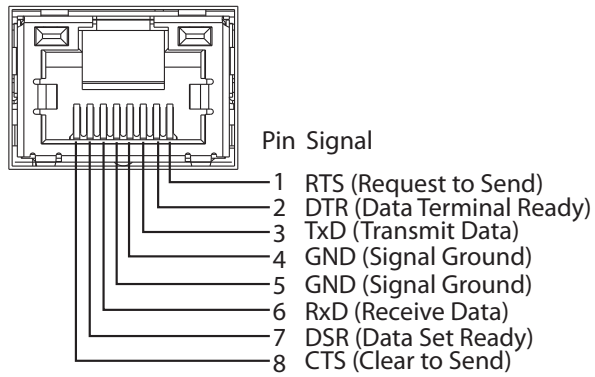

Serial Port Details

The pinout details of the rear RJ-45 serial port connector are shown in [Figure 19](#).

Figure 19 Serial Port (Female RJ-45 Connector) Pinout

Serial Port (RJ-45 Female Connector)

KVM Cable

The KVM cable provides a connection into the server, providing a DB9 serial connector, a VGA connector for a monitor, and dual USB ports for a keyboard and mouse. With this cable, you can create a direct connection to the operating system and the BIOS running on the server.

The KVM cable ordering information is listed in [Table 41](#).

2	DB-9 serial connector	4	Two-port USB connector (for a mouse and keyboard)

SPARE PARTS

This section lists the upgrade and service-related parts for the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes. Some of these parts are configured with every server.

NOTE: Some spare parts you order may also require accessories for full functionality. For example, drives or RAID controllers may need accompanying cables. CPUs may need heatsinks, thermal paste, and installation tools. The spares and their accessory parts are listed in [Table 42](#).

Table 42 Spare Parts

Product ID (PID)	PID Description
KVM Cable	
N20-BKVM=	KVM local IO cable for UCS servers console port
Risers	
UCSC-R2R3-C220M6=	Kit containing two half-height risers (risers 2 and 3)
HX-GPURKIT-C220=	Kit containing a GPU mounting bracket and the following risers (risers 1 and 2)
UCSC-FBRS-C220M6=	Riser 2 and Riser 3 blank panels
CPUs	
<p>Note: If you are ordering a second CPU, see the CPU Accessories section in this table for additional parts you may need to order for the second CPU.</p>	
8000 Series Processors	
HX-CPU-I8380=	Intel 8380 2.3GHz/270W 40C/60MB DDR4 3200MHz
HX-CPU-I8368=	Intel 8368 2.4GHz/270W 38C/57MB DDR4 3200MHz
HX-CPU-I8362=	Intel 8362 2.8GHz/265W 32C/48MB DDR4 3200MHz-
HX-CPU-I8360Y=	Intel 8360Y 2.4GHz/250W 36C/54MB DDR4 3200MHz
HX-CPU-I8358P=	Intel 8358P 2.6GHz/240W 32C/48MB DDR4 3200MHz
HX-CPU-I8358=	Intel 8358 2.6GHz/250W 32C/48MB DDR4 3200MHz
HX-CPU-I8352Y=	Intel 8352Y 2.2GHz/205W 32C/48MB DDR4 3200MHz
HX-CPU-I8352V=	Intel 8352V 2.1GHz/195W 36C/54MB DDR4 2933MHz
HX-CPU-I8352M=	Intel 8352M 2.3GHz/185W 32C/48MB DDR4 3200MHz
HX-CPU-I8352S=	Intel 8352S 2.2GHz/205W 32C/48MB DDR4 3200MHz
HX-CPU-I8351N=	Intel 8351N 2.4GHz/225W 36C/54MB DDR4 2933MHz

Notes:

1. This part is included with the purchase of option or spare CPU or CPU processor kits.
2. The 2300 W power supply uses a different power connector than the rest of the power supplies, so you must use different power cables to connect it. See [Table 22 on page 48](#) and [Table 23 on page 51](#).

UPGRADING or REPLACING CPUs

NOTE: Before servicing any CPU, do the following:

- Decommission and power off the server.
- Slide the HX220C M6 All NVMe/All Flash/Hybrid Server Nodes out from the rack.
- Remove the top cover.

To replace an existing CPU, follow these steps:

(1) Have the following tools and materials available for the procedure:

- T-30 Torx driver—Supplied with replacement CPU.
- #1 flat-head screwdriver—Supplied with replacement CPU.
- CPU assembly tool—Supplied with replacement CPU. Can be ordered separately as Cisco PID UCS-CPUAT=.
- Heatsink cleaning kit—Supplied with replacement CPU. Can be ordered separately as Cisco PID UCSX-HSCK=.
- Thermal interface material (TIM)—Syringe supplied with replacement CPU. Can be ordered separately as Cisco PID UCS-CPU-TIM=.

(2) Order the appropriate replacement CPU from [Table 6 on page 21](#)

Carefully remove and replace the CPU and heatsink in accordance with the instructions found in “Cisco M5 Server Installation and Service Guide,” found at:

https://www.cisco.com/content/en/us/td/docs/unified_computing/ucs/c/hw/c220m6/install/c220m6.html

To add a new CPU, follow these steps:

(1) Have the following tools and materials available for the procedure:

- T-30 Torx driver—Supplied with new CPU.
- #1 flat-head screwdriver—Supplied with new CPU
- CPU assembly tool—Supplied with new CPU. Can be ordered separately as Cisco PID UCS-CPUAT=
- Thermal interface material (TIM)—Syringe supplied with replacement CPU. Can be ordered separately as Cisco PID UCS-CPU-TIM=

(2) Order the appropriate new CPU from [Table 6 on page 21](#)

(3) Order one heat sink for each new CPU. Order PID UCSC-HSLP-M6=.

Carefully install the CPU and heatsink in accordance with the instructions found in “Cisco M5 Server Installation and Service Guide,” found at:

https://www.cisco.com/content/en/us/td/docs/unified_computing/ucs/c/hw/c220m6/install/c220m6.html

UPGRADING or REPLACING MEMORY

NOTE: Before servicing any DIMM or PMem, do the following:

- Decommission and power off the server.
- Remove the top cover from the server
- Slide the server out the front of the chassis.

To add or replace DIMMs or PMem, follow these steps:

Step 1 Open both DIMM connector latches.

Step 2 Press evenly on both ends of the DIMM until it clicks into place in its slot

Note: Ensure that the notch in the DIMM aligns with the slot. If the notch is misaligned, it is possible to damage the DIMM, the slot, or both.

Step 3 Press the DIMM connector latches inward slightly to seat them fully.

Step 4 Populate all slots with a DIMM or DIMM blank. A slot cannot be empty.

Figure 21 Replacing Memory

For additional details on replacing or upgrading DIMMs and PMem, see “Cisco M5 Server Installation and Service Guide” found at this link:

https://www.cisco.com/content/en/us/td/docs/unified_computing/ucs/c/hw/c220m6/install/c220m6.html

TECHNICAL SPECIFICATIONS

Dimensions and Weight

Table 43 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes Dimensions and Weight

Parameter	Value
Height	1.70 in. (4.3 cm)
Width (Not including slam latches)	16.9 in. (42.9 cm)
Width (including slam latches)	18.9 in. (48.0 cm)
Depth	30 in. (76.2 cm)
Front Clearance	3 in. (76 mm)
Side Clearance	1 in. (25 mm)
Rear Clearance	6 in. (152 mm)
Weight	
Weight with following options and no rail kit: 1 HDD, 1 CPU, 1 DIMM, and 1 1600 W power supply	22.32 lbs (10.1 kg)
Weight with following options and including rail kit: 1 HDD, 1 CPU, 1 DIMM, and 1 1600 W power supply	32.38 lbs (14.7 kg)
Weight with following options and no rail kit: 10 HDDs, 2 CPUs, 32 DIMMs, and 2 1600 W power supplies	32.38 lbs (14.7 kg)
Weight with following options and including rail kit: 10 HDDs, 2 CPUs, 32 DIMMs, and 2 1600 W power supplies	42.43 lbs (19.3 kg)

Power Specifications

The HX220C M6 All NVMe/All Flash/Hybrid Server Nodes is available with the following types of power supplies:

- 1050 W (AC) power supply (see [Table 44](#)).
- 1050 W V2 (DC) power supply (see [Table 45](#)).
- 1600 W (AC) power supply (see [Table 46](#)).
- 2300 W (AC) power supply (see [Table 47](#)).

Table 44 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes Power Specifications (1050 W AC power supply)

Parameter	Specification			
Input Connector	IEC320 C14			
Input Voltage Range (V rms)	100 to 240			
Maximum Allowable Input Voltage Range (V rms)	90 to 264			
Frequency Range (Hz)	50 to 60			
Maximum Allowable Frequency Range (Hz)	47 to 63			
Maximum Rated Output (W) ¹	800		1050	
Maximum Rated Standby Output (W)	36			
Nominal Input Voltage (V rms)	100	120	208	230
Nominal Input Current (A rms)	9.2	7.6	5.8	5.2
Maximum Input at Nominal Input Voltage (W)	889	889	1167	1154
Maximum Input at Nominal Input Voltage (VA)	916	916	1203	1190
Minimum Rated Efficiency (%) ²	90	90	90	91
Minimum Rated Power Factor ²	0.97	0.97	0.97	0.97
Maximum Inrush Current (A peak)	15			
Maximum Inrush Current (ms)	0.2			
Minimum Ride-Through Time (ms) ³	12			

Notes:

1. Maximum rated output is limited to 800W when operating at low-line input voltage (100-127V).
2. This is the minimum rating required to achieve 80 PLUS Platinum certification, see test reports published at <http://www.80plus.org/> for certified values.
3. Time output voltage remains within regulation limits at 100% load, during input voltage dropout.

Table 45 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes Power Specifications (1050 W V2 DC power supply)

Parameter	Specification
Input Connector	Molex 42820
Input Voltage Range (V rms)	-48
Maximum Allowable Input Voltage Range (V rms)	-40 to -72
Frequency Range (Hz)	NA
Maximum Allowable Frequency Range (Hz)	NA
Maximum Rated Output (W)	1050
Maximum Rated Standby Output (W)	36
Nominal Input Voltage (V rms)	-48
Nominal Input Current (A rms)	24
Maximum Input at Nominal Input Voltage (W)	1154
Maximum Input at Nominal Input Voltage (VA)	1154
Minimum Rated Efficiency (%) ¹	91
Minimum Rated Power Factor ¹	NA
Maximum Inrush Current (A peak)	15
Maximum Inrush Current (ms)	0.2
Minimum Ride-Through Time (ms) ²	5

Notes:

1. This is the minimum rating required to achieve 80 PLUS Platinum certification, see test reports published at <http://www.80plus.org/> for certified values.
2. Time output voltage remains within regulation limits at 100% load, during input voltage dropout.

Table 46 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes 1600 W (AC) Power Supply Specifications

Parameter	Specification			
Input Connector	IEC320 C14			
Input Voltage Range (V rms)	200 to 240			
Maximum Allowable Input Voltage Range (V rms)	180 to 264			
Frequency Range (Hz)	50 to 60			
Maximum Allowable Frequency Range (Hz)	47 to 63			
Maximum Rated Output (W)	1600			
Maximum Rated Standby Output (W)	36			
Nominal Input Voltage (V rms)	100	120	208	230
Nominal Input Current (A rms)	NA	NA	8.8	7.9
Maximum Input at Nominal Input Voltage (W)	NA	NA	1778	1758
Maximum Input at Nominal Input Voltage (VA)	NA	NA	1833	1813
Minimum Rated Efficiency (%) ¹	NA	NA	90	91
Minimum Rated Power Factor ²	NA	NA	0.97	0.97
Maximum Inrush Current (A peak)	30			
Maximum Inrush Current (ms)	0.2			
Minimum Ride-Through Time (ms) ²	12			

Notes:

1. This is the minimum rating required to achieve 80 PLUS Platinum certification, see test reports published at <http://www.80plus.org/> for certified values.
2. Time output voltage remains within regulation limits at 100% load, during input voltage dropout.

Table 47 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes 2300 W (AC) Power Supply Specifications

Parameter	Specification			
Input Connector	IEC320 C20			
Input Voltage Range (Vrms)	100 to 240			
Maximum Allowable Input Voltage Range (Vrms)	90 to 264			
Frequency Range (Hz)	50 to 60			
Maximum Allowable Frequency Range (Hz)	47 to 63			
Maximum Rated Output (W) ¹	2300			
Maximum Rated Standby Output (W)	36			
Nominal Input Voltage (Vrms)	100	120	208	230
Nominal Input Current (Arms)	13	11	12	10.8
Maximum Input at Nominal Input Voltage (W)	1338	1330	2490	2480
Maximum Input at Nominal Input Voltage (VA)	1351	1343	2515	2505
Minimum Rated Efficiency (%) ²	92	92	93	93
Minimum Rated Power Factor ²	0.99	0.99	0.97	0.97
Maximum Inrush Current (A peak)	30			
Maximum Inrush Current (ms)	0.2			
Minimum Ride-Through Time (ms) ³	12			

Notes:

1. Maximum rated output is limited to 1200W when operating at low-line input voltage (100-127V)
2. This is the minimum rating required to achieve 80 PLUS Titanium certification, see test reports published at <http://www.80plus.org/> for certified values
3. Time output voltage remains within regulation limits at 100% load, during input voltage dropout

For configuration-specific power specifications, use the Cisco UCS Power Calculator at this URL:

<http://ucspowercalc.cisco.com>

Environmental Specifications

The environmental specifications for the M6 All NVMe/All Flash/Hybrid Server Nodes are listed in [Table 48](#).

Table 48 M6 Environmental Specifications

Parameter	Minimum
Operating Temperature	<p>Dry bulb temperature of 10°C to 35°C (50°F to 95°F)</p> <p>Maximum temperature change of 20°C (36°F) per hour (a temperature change within a specified period of time and not a rate of change)</p> <p>Humidity condition: Uncontrolled, not to exceed 50% RH starting condition</p> <p>Derate the maximum temperature by 1°C (33.8°F) per every 305 meters of altitude above 900m</p>
Extended Operating Temperature	<p>5°C to 40°C (41°F to 104°F) with no direct sunlight</p> <p>Humidity condition: Uncontrolled, not to exceed 50% RH starting condition</p> <p>Derate the maximum temperature by 1°C (33.8°F) per every 305 meters of altitude above 900m</p>
Non-Operating Temperature	Dry bulb temperature of -40°C to 65°C (-40°F to 149°F)
Operating Relative Humidity	<p>10% to 90% and 28°C (82.4°F) maximum dew-point temperature, non-condensing environment</p> <p>Minimum to be higher (more moisture) of -12°C (10.4°F) dew point or 8% relative humidity</p> <p>Maximum to be 24°C (75.2°F) dew point or 90% relative humidity</p>
Non-Operating Relative Humidity	5% to 93% relative humidity, non-condensing, with a maximum wet bulb temperature of 28°C across the 20°C to 40°C dry bulb range.
Maximum Operating Duration	Unlimited
Operating Altitude	A maximum elevation of 3050 meters (10,006 ft)
Non-Operating Altitude	An elevation of 0 to 12,000 meters (39,370 ft)
Sound Power level, Measure A-weighted per ISO7779 LWAd (Bels) Operation at 23°C (73°F)	5.5
Sound Pressure level, Measure A-weighted per ISO7779 LpAm (dBA) Operation at 23°C (73°F)	40

Extended Operating Temperature Hardware Configuration Limits

Table 49 HX220C M6 All NVMe/All Flash/Hybrid Server Nodes Extended Operating Temperature Hardware Configuration Limits

Platform ¹	ASHRAE A3 (5°C to 40°C) ²	ASHRAE A4 (5°C to 45°C) ³
Processors:	155W+	155W+ and 105W+ (4 or 6 Cores)
Memory:	LRDIMMs	LRDIMMs
Storage:	M.2 SATA SSDs NVMe SSDs	M.2 SATA SSDs NVMe SSDs
Peripherals:	PCIe NVMe SSDs GPUs	MRAID PCIe NVMe SSDs GPUs mLOMs VICs NICs HBAs

Notes:

1. Two PSUs are required and PSU failure is not supported
2. Non-Cisco UCS qualified peripherals and/or peripherals that consume more than 25W are not supported
3. High power or maximum power fan control policy must be applied

Compliance Requirements

The regulatory compliance requirements for HX-Series servers are listed in [Table 50](#).

Table 50 HX-Series Regulatory Compliance Requirements

Parameter	Description
Regulatory Compliance	Products should comply with CE Markings per directives 2014/30/EU and 2014/35/EU
Safety	UL 60950-1 Second Edition CAN/CSA-C22.2 No. 60950-1 Second Edition EN 60950-1 Second Edition IEC 60950-1 Second Edition AS/NZS 60950-1 GB4943 2001
EMC - Emissions	47CFR Part 15 (CFR 47) Class A AS/NZS CISPR32 Class A CISPR32 Class A EN55032 Class A ICES003 Class A VCCI Class A EN61000-3-2 EN61000-3-3 KN32 Class A CNS13438 Class A
EMC - Immunity	EN55024 CISPR24 EN300386 KN35
