

Release Notes for Cisco Small Business SPA525G or SPA525G2 Firmware Version 7.5.5b

Updated: May 2014

These Release Notes describe the updates and fixes in version 7.5.5b of the Cisco SPA525G or Cisco SPA525G2 firmware.

As with any firmware release, read these release notes before upgrading the firmware. Cisco also recommends backing up the configuration before any firmware upgrade.

NOTE There are two SPA525G/525G2 firmware versions. One of them contains updated Bluetooth firmware (identified by -bt in the filename). The updated Bluetooth version is larger in size and takes longer to install (about 3 to 4 minutes). If the Bluetooth firmware version you are using is below 0.00.34, we recommend that you install the -bt version of this firmware. To see which Bluetooth version is installed on your phone, view the Bluetooth Firmware Version parameter in the Info tab in the web management interface.
