

Third-Party Virtual Network Function (VNF) Certification Testing

This document must be read in conjunction with the [How Cisco Provides Services](#) document, which is incorporated into this document by reference.

Third-Party Virtual Network Function (VNF) Certification Testing (AS-Fixed SKU: ASF-CORE-VAL-VNF) provides basic compatibility testing with the agreed-upon VNF Third-Party vendor's products and Cisco's Network Function Virtualization (NFV) infrastructure.

Test Execution

Cisco will provide the following:

- Setup the NFV lab environment at Cisco Lab site according to the Certification Program requirements.
- Based on the documentation that the third-party vendor provides, run through Certification test plan and provide PASS/FAIL state to the Customer.
- Provide the Customer with the Test Report containing validation test findings and review findings with the Customer.

Additional Customer Responsibilities:

- Prior to the Services, Customer must have agreed to participate in the Cisco Open NFV Program located at the following site: <https://developer.cisco.com/docs/nfv/#!program-description/goal>.
- Provide Cisco the VNF image, license, VNF on boarding documentation to complete the certification testing.
- Provide technical support upon troubleshooting session.
