March 29, 2018

Whom It May Concern:

Acumen Security verified that the following product faithfully embeds a FIPS 140-2 validated cryptographic module,

Prime Infrastructure version 3.2

The software version is known to operate on the following platform(s):

• Red Hat Enterprise Linux 6

During the course of the review, Acumen Security confirmed that the following cryptographic module is properly incorporated into the product:

- CiscoSSL FIPS Object Module, version 6.0, FIPS 140-2 Certificate #2505
- Red Hat Enterprise Linux Libreswan Cryptographic Module, version 4.0, FIPS 140-2 Certificate #2721

As part of the review, the software was tested on the following platforms:

Red Hat Enterprise Linux 6.7

Acumen Security confirmed that the following features leverage at least one of the embedded cryptographic modules to provide cryptographic services for IKE/IPsec, SNMPv3, SSH, TLS and Single Sign-on.

- Session establishment supporting each service,
- All underlying cryptographic algorithms supporting each services' key derivation functions.
- Hashing for each service.
- Symmetric encryption for each service.

Details of the verification may be obtained from Cisco Systems, Inc. at the request of interested parties. This letter represents the independent opinions of Acumen Security and does not imply endorsement of the product by the CMVP or any other parties.

Sincerely

Ashit Vora

Laboratory Director
