Introduction

This document describes the steps to configure IP over Ethernet (IPoE) sessions over Pseudowire Headend (PWHE) on ASR9K.

Prerequisites

Requirements

Cisco recommends that you have knowledge of these topics:

- MPLS Layer 2 VPN
- BNG Functionality on ASR9K

Tip: Refer to the [Broadband Network Gateway Configuration Guide for Cisco ASR 9000 Series](#) Cisco article in order to gain familiarity with BNG functionality.

Tip: Refer to the [MPLS Layer 2 VPNs Configuration Guide](#) Cisco article in order to gain familiarity with MPLS Layer 2 VPNs.

Components Used

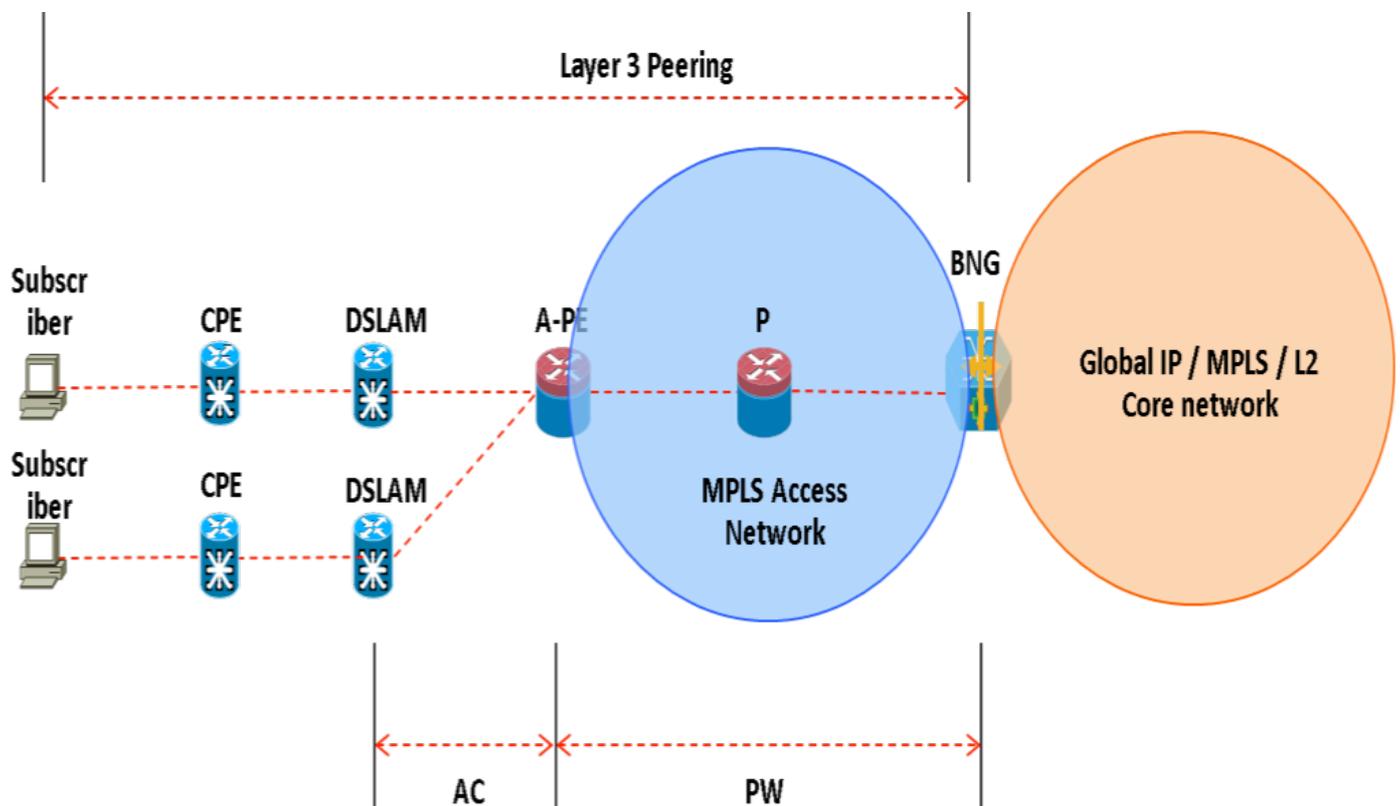

This document is not restricted to specific software version but the line card which we used on ASR9K is A9K-MPA-20X1GE.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Background Information

BNG provides subscriber support over PWHE. PWHE provides L3 connectivity to customer edge nodes through a pseudowire connection. PWHE terminates the L2VPN circuits that exists between the access-provide edge (A-PE) nodes, to a virtual interface, and performs routing on the native IP packet. Each virtual interface can use one or more physical interfaces towards the access cloud to reach customer routers through the A-PE nodes.

Note: This feature is supported for PPPoE PTA, PPPoE LAC Subscriber Over PWHE and IPoE subscribers.

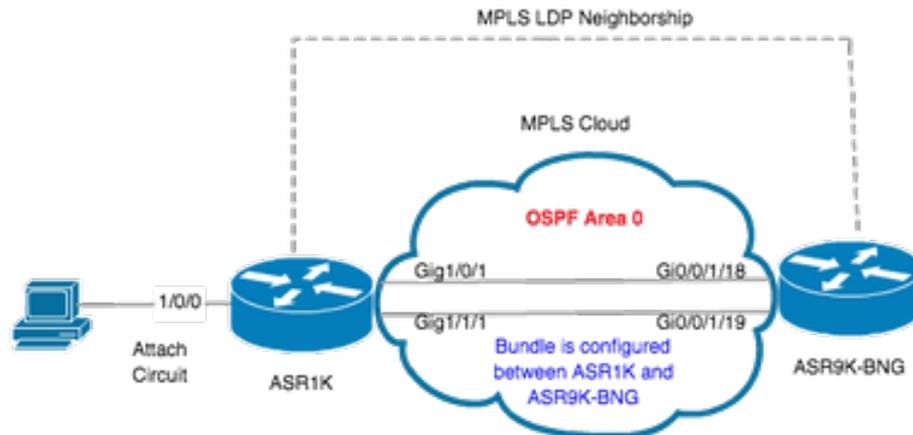

Configure

Network Diagram

In order to perform this test, one ASR1K with version 154-3.S2 is employed and ASR9K with version IOS-XR 5.2.2. OSPF is used as routing protocol to reach each other loopback addresses.

ASR9K Loopback Address: 10.1.1.1/32

ASR1K Loopback Address: 10.2.2.2/32

ASR1K

```
pseudowire-class MPLS
encapsulation mpls
```

```
interface GigabitEthernet1/0/0 no ip address media-type rj45 negotiation auto cdp enable
xconnect 10.1.1.1 2020 encapsulation mpls pw-class MPLS end
```

```
ASR1K#show etherchannel summary
```

```
Flags: D - down          P/bndl - bundled in port-channel
       I - stand-alone  s/susp - suspended
       H - Hot-standby (LACP only)
       R - Layer3       S - Layer2
       U - in use       f - failed to allocate aggregator
```

```
M - not in use, minimum links not met
u - unsuitable for bundling
w - waiting to be aggregated
d - default port
```

```
Number of channel-groups in use: 1
Number of aggregators:          1
```

```
Group  Port-channel  Protocol  Ports
-----+-----+-----+-----
20Po20 (RU) LACP Gi1/0/1(bndl) Gi1/1/1(bndl)
```

```
RU - L3 port-channel UP State
SU - L2 port-channel UP state
P/bndl - Bundled
S/susp - Suspended
```

```
interface Port-channel20
ip address 192.168.20.2 255.255.255.0
no negotiation auto
mpls ip
end
```

ASR9K

Here is the configuration from ASR9K, which acts as BNG PWHE.

```
ASR1K#show etherchannel summary
Flags: D - down          P/bndl - bundled in port-channel
       I - stand-alone  s/susp - suspended
       H - Hot-standby (LACP only)
       R - Layer3       S - Layer2
       U - in use       f - failed to allocate aggregator

       M - not in use, minimum links not met
       u - unsuitable for bundling
       w - waiting to be aggregated
       d - default port
```

```
Number of channel-groups in use: 1
Number of aggregators:           1
```

```
Group  Port-channel  Protocol  Ports
-----+-----+-----+-----
20Po20(RU)LACP Gi1/0/1(bndl) Gi1/1/1(bndl)
```

```
RU - L3 port-channel UP State
SU - L2 port-channel UP state
P/bndl - Bundled
S/susp - Suspended
```

```
interface Port-channel20
ip address 192.168.20.2 255.255.255.0
no negotiation auto
mpls ip
end
```

Now, configure the xconnect between ASR1K and ASR9K. Specify the loopback address of ASR1K (10.2.2.2/32) as xconnect neighbor.

```
l2vpn router-id 10.1.1.1 pw-class ASR1K encapsulation mpls transport-mode ethernet ! ! xconnect group PWHE p2p ASR1K
interface PW-Ether20 neighbor ipv4 10.2.2.2 pw-id 2020
    pw-class ASR1K
    !
    !
    !
    !
generic-interface-list BE20_ONLY
interface Bundle-Ether20
interface GigabitEthernet0/0/1/18
```

```

interface GigabitEthernet0/0/1/19
!
interface PW-Ether20
  ipv4 address 192.168.1.1 255.255.255.0
  attach generic-interface-list BE20_ONLY
!

```

Now, configure the subscriber control policy and apply on PW-Ethernet interface where subscriber is terminated.

```

dynamic-template
  type ipsubscriber WDAAR_PWHE_DT
  ipv4 verify unicast source reachable-via rx
  ipv4 unnumbered Loopback44
  ipv4 unreachable disable
!
!
policy-map type control subscriber IPoE_WDAAR_PWHE
  event session-start match-first
  class type control subscriber DHCPv4 do-until-failure
    5 authorize aaa list WDAAR identifier source-address-mac password cisco
    10 activate dynamic-template WDAAR_PWHE_DT
!
!
end-policy-map

```

```

interface PW-Ether20.250
  ipv4 address 192.168.10.1 255.255.255.252
  service-policy type control subscriber IPoE_WDAAR_PWHE
  encapsulation dot1q 250
  ipsubscriber ipv4 l2-connected
  initiator dhcp
!
!

```

Verify

This section provides information that you can use in order to verify that your configuration works properly. Here are the commands you can employ to verify that xconnect is UP/UP on ASR9K.

```
RP/0/RSP0/CPU0:ACDC-ASR9000-1#show l2vpn xconnect
```

Legend: ST = State, UP = Up, DN = Down, AD = Admin Down, UR = Unresolved,
SB = Standby, SR = Standby Ready, (PP) = Partially Programmed

XConnect		Segment 1			Segment 2	
Group	Name	ST	Description	ST	Description	ST
PWHE	ASR1K	UP	PE20	UP	10.2.2.2	2020 UP

```
RP/0/RSP0/CPU0:ACDC-ASR9000-1#show l2vpn xconnect brief
```

```
AToM
```

Like-to-Like	UP	DOWN	UNR
PW-Ether	1	0	0
Total	1	0	0
Total	1	0	0

Total: 1 UP, 0 DOWN, 0 UNRESOLVED

```
RP/0/RSP0/CPU0:ACDC-ASR9000-1#show subscriber session filter ipv4-address 192.168.44.254
Codes: IN - Initialize, CN - Connecting, CD - Connected, AC - Activated,
      ID - Idle, DN - Disconnecting, ED - End
```

Type	Interface	State	IP Address (Vrf)
IP:DHCP	PE20.250.ip1	AC	192.168.44.254 (default)

Once the xconnect is UP and IPoE session comes online on ASR9K you can see that Access-interface is PW-Ether.

```
RP/0/RSP0/CPU0:ACDC-ASR9000-1#show subscriber session filter ipv4-address 192.168.44.254 detail
Interface:                PW-Ether20.250.ip1
Circuit ID:                Unknown
Remote ID:                 Unknown
Type:                     IP: DHCP-trigger
IPv4 State:                Up, Mon Apr 20 19:32:51 2015
IPv4 Address:              192.168.44.254, VRF: default
Mac Address:                001f.ca3f.7924
Account-Session Id:        00000068
Nas-Port:                  Unknown
User name:                 001f.ca3f.7924
Formatted User name:        unknown
Client User name:          unknown
Outer VLAN ID:             250
Subscriber Label:          0x000001db
Created:                   Mon Apr 20 19:32:49 2015
State:                     Activated
Authentication:            unauthenticated
Authorization:              authorized
Access-interface:        PW-Ether20.250
Policy Executed:
policy-map type control subscriber IPoE_WDAAR_PWHE
  event Session-Start match-first [at Mon Apr 20 19:32:49 2015]
  class type control subscriber DHCPv4 do-until-failure [Succeeded]
    5 authorize aaa list WDAAR [Succeeded]
    10 activate dynamic-template WDAAR_PWHE_DT [Succeeded]
Session Accounting: disabled
Last COA request received: unavailable
```

Now, verify the Layer 3 connectivity of BNG subscriber over PWHE.

```
RP/0/RSP0/CPU0:ACDC-ASR9000-1#show subscriber session filter ipv4-address 192.168.44.254 detail
Interface:                PW-Ether20.250.ip1

Access-interface:            PW-Ether20.250
Policy Executed:
policy-map type control subscriber IPoE_WDAAR_PWHE
  event Session-Start match-first [at Mon Apr 20 19:32:49 2015]
  class type control subscriber DHCPv4 do-until-failure [Succeeded]
    5 authorize aaa list WDAAR [Succeeded]
    10 activate dynamic-template WDAAR_PWHE_DT [Succeeded]
Session Accounting: disabled
Last COA request received: unavailable
```

Troubleshoot

This section provides information that you can use in order to troubleshoot your configuration and verify the xconnect status on ASR9K.

Command to Verify the ASR9K Configuration

These commands can be used to verify the configuration is correct on ASR9K.

- **show running-configuration l2vpn**
- **show running-configuration int PW-Ether<Interface-Number>**
- **show running-configuration mpls ldp**
- **show running-configuration generic-interface-list**

Check L2VPN XC's

Check the xconnect. The xconnect (and therefore the AC and PW) has to be up. You can employ these commands to verify the status.

- **show l2vpn xconnect summary**

```
RP/0/RSP0/CPU0:ACDC-ASR9000-1#show l2vpn xconnect summary

Check Labels

Check label in label table. You need to first get the internal labels from xconnect information with this command.

- **show l2vpn xconnect detail**

then search for **internal Label** in the output and then execute this show command to verify the label and interface association on ASR9K.

- **show mpls label table label <internal_label> detail**

```

RP/0/RSP0/CPU0:ACDC-ASR9000-1#show l2vpn xconnect detail

Traffic Drop/Sessions do not come up

If session does not come up, check if packets dropped in NP. You can use these commands to see the packet drop in NP on ASR9K.

- **clear counters**
- **show l2vpn xconnect detail | include packet**
- **clear controllers np counters all**
- **show controller np counters all**

BNG Related Show Commands

Use these commands in order check the BNG related information on ASR9K.

- **show subscriber session all summary**
- **show subscriber manager disconnect-history unique summary**
- **show subscriber manager statistics debug total**
- **show subscriber manager statistics summary total**
- **show subscriber manager trace event/error**

Debugs to be Enabled

If session did not come up on ASR9K and you did not find any packet dropped on NP then you can enable these debugs on ASR9K to see why session is not coming up in ASR9K.

- **debug l2vpn ea pwhe platform verbose**
- **debug l2vpn forwarding platform common all**
- **debug pm api location <location>**

- **debug pm error location <location>**
- **debug uidb api errors location <location>**

Escalation

If you still have an issue please reach out to Cisco TAC and collect the Show tech from ASR9K.

- **show tech-support subscriber**
- **show tech-support l2vpn**
