Cisco Nexus 1000V Series Switch Documentation viii

Obtaining Documentation and Submitting a Service Request viii

CHAPTER 1 **Cisco Virtual Security Gateway Overview** 1-1

Information About the Cisco Virtual Security Gateway 1-1

Overview 1-1

Product Architecture 1-2

Trusted Multitenant Access 1-4

Dynamic (Virtualization-Aware) Operation 1-4

Cisco Virtual Security Gateway Configuration for the Network 1-5

Setting Up Cisco VSGs and VLANs 1-5

Cisco VSG Configuration Overview 1-6

Cisco Nexus 1000V Series Switch VSM 1-7

Port Profile 1-7

Virtual Security Gateway 1-7

Security Profile 1-7

Firewall Policy 1-8

Service Firewall Logging 1-9

Sequence in Configuring a Cisco VSG 1-9

CHAPTER 2 **Cisco Virtual Security Gateway Command-Line Interface** 2-1

Information About the CLI Prompt 2-1

Command Modes 2-2

Information About Command Modes 2-2

EXEC Command Mode 2-3

Global Configuration Command Mode 2-3

Exiting a Configuration Mode 2-3
Command Mode Summary 2-4
Saving CLI Configuration Changes 2-4
Running Configuration 2-4
Startup Configuration 2-4
Copying the Running Configuration to the Startup Configuration 2-5
Special Characters 2-5
Keystroke Shortcuts 2-5
Abbreviating Commands 2-7
Using the no Form of a Command 2-7
Using Help 2-7

CHAPTER 3 **Configuring the Cisco Virtual Security Gateway Port Profile on the Cisco Nexus 1000V Series Switch** 3-1
Configuring the Cisco VSG Port Profile on the Cisco Nexus 1000V Series Switch VSM for Protection from Service Loss 3-1
Verifying the Cisco VSG Configuration 3-4
Where to Go Next 3-4

CHAPTER 4 **Cisco Virtual Security Gateway System Management** 4-1
Information About VSG System Management 4-1
Changing the Cisco VSG Instance Name 4-2
Configuring a Message of the Day 4-2
Verifying the Configuration 4-3
Verifying the Software and Hardware Versions 4-3
Verifying the Running Configuration 4-4
Comparing the Startup and Running Configurations 4-6
Displaying Interface Configurations 4-7
Displaying a Brief View of a Specific Interface Configuration 4-7
Displaying a Detailed View of a Specific Interface Configuration 4-8
Displaying a Brief View of All Interfaces 4-9
Verifying the Running Configuration for All Interfaces 4-9
Saving a Configuration 4-10
Erasing a Configuration 4-11
Displaying a Cisco VSG Instance 4-11
Navigating the File System 4-12
Specifying File Systems 4-12
Identifying Your Current Working Directory 4-13

Changing Your Directory 4-13
Listing the Files in a File System 4-14
Identifying Available File Systems for Copying Files 4-15
Using Tab Completion 4-16
Copying and Backing Up Files 4-17
Creating a Directory 4-18
Removing an Existing Directory 4-18
Moving Files 4-19
Deleting Files or Directories 4-19
Compressing Files 4-20
Uncompressing Files 4-21
Directing Command Output to a File 4-22
Verifying a Configuration File Before Loading 4-23
Reverting to a Previous Configuration 4-24
Displaying Files 4-24
Displaying File Contents 4-25
Displaying Directory Contents 4-25
Displaying File Checksums 4-26
Displaying the Last Lines in a File 4-27
Displaying the Current User Access 4-27
Sending a Message to Users 4-28

CHAPTER 5 **Cisco Virtual Security Gateway High Availability** 5-1
Information About High Availability 5-1
Redundancy 5-2
Isolation of Processes 5-2
Cisco VSG Failover 5-3
System-Control Services 5-3
System Manager 5-4
Persistent Storage Service 5-4
Message and Transaction Service 5-4
HA Policies 5-4
Cisco VSG HA Pairs 5-5
Cisco VSG Roles 5-5
HA Pair States 5-5
Cisco VSG HA Pair Synchronization 5-5
Cisco VSG HA Pair Failover 5-6
Failover Characteristics 5-6

Automatic Failover 5-6
Manual Failover 5-7
Cisco VSG HA Guidelines and Limitations 5-7
Changing the Cisco VSG Role 5-7
Configuring a Failover 5-9
Guidelines and Limitations 5-9
Verifying that a Cisco VSG Pair is Ready for a Failover 5-9
Manually Switching the Active Cisco VSG to Standby 5-10
Assigning IDs to HA Pairs 5-12
Pairing a Second Cisco VSG with an Active Cisco VSG 5-13
Changing the Standalone Cisco VSG to a Primary Cisco VSG 5-13
Verifying the Change to a Cisco VSG HA Pair 5-15
Replacing the Standby Cisco VSG in an HA Pair 5-15
Replacing the Active Cisco VSG in an HA Pair 5-16
Verifying HA Status 5-17

CHAPTER 6 **Cisco Virtual Security Gateway Firewall Profiles and Policy Objects 6-1**
Information About Cisco VSG Firewall Policy Objects 6-1
Cisco VSG Prerequisites, Guidelines, and Limitations 6-1
Default Settings 6-2
Cisco VSG Firewall Policy Objects 6-2
Zones 6-3
Object Groups 6-3
Rules 6-3
Policies 6-4
Cisco Virtual Security Gateway Attributes 6-4
Information About Attribute Name Notations 6-4
Attribute Classes 6-5
Security Profiles 6-7
Viewing Security Profiles and Policies on the Cisco VNMC and the Cisco VSG 6-8
Service Firewall Logging 6-10
Verifying the Cisco VSG Configuration 6-11
Configuration Limits 6-12
