### Introduction

The following is an Application Note for E911 Interoperability of a Cisco Unified Communications Manager 6.0 and Cisco Emergency Responder 2.0 to a NEC IPX2400 PBX via a Cisco Media Module CMM T1-QSIG trunk. The CUCM system is connected to a simulated E911 PSAP (Public Safety Answering Point) via a Cisco 3845 w/ CAMA trunk registered using H323. The Network Topology diagram shows the test set-up for interoperability between the Cisco Unified Communications Manager and Cisco Emergency Responder connected to the PBX via a T1 QSIG trunk using Cisco WS-SVC-CMM-6T1 MGCP Gateway.

### **Network Topology**

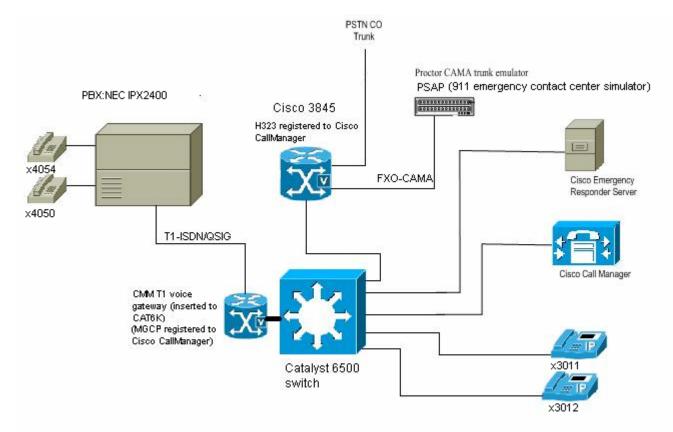

Figure 1. Network Topology or Test Setup

# Limitations

Unique DID numbers must be used to associate with each Emergency Response Location to allow the return call if the 911 caller is disconnected.

Each available calling party that might dial 911 from the PBX side must have that calling party number configured in the Manually Configured Phones screen of the Cisco Emergency Responder.

# **System Components**

#### **Hardware Requirements**

#### Cisco Hardware

Cisco 3825 Gateway with NM-HD-V2/VIC2-4FXO (CAMA trunk) Cisco Cat6K switch Cisco Unified Communications Manager server Cisco Emergency Responder server Cisco WS-SVC-CMM-6T1 Communications Media Module (inserted into cat6K) NEC IPX2400

#### **Software Requirements**

Cisco IOS Software release "c3825-ipvoice-mz.124-11.T" Cisco IOS Software release "wscmm-ipvoicek9-mz.124-11.T PBX Software: Version Release 15 Cisco Unified Communications Manager 6.0 Cisco Emergency Responder 2.0

#### Configuring the NEC IPX2400 PBX

The NEC requires a substantial amount of programming and circuit card switch settings to properly install T1 PRI. It is beyond the scope of this document to provide the entire configuration, therefore the NEC information below is directed to NEC techs

The switch settings and software references in this document assume a familiarity with the NEC 2400. It is highly recommended to have a NEC ISDN certified technician setup the NEC portion.

Configure in the following sequence:

Install Circuit Card

Configure all software

Circuit Card Configuration (PA-24PRTB)
